VOL. 10 No. 27

MOKENA, ILLINOIS

FRIDAY, MARCH 15, 1929.

\$1.50 per year in advance

Hundreds Attend Last Rites For W. H. Bechstein

Hundreds of friends, neighbors, relatives and former business associations attended the funeral services held Saturday afternoon at the St. John Evangelical church in Mokena for W. H. Bechstein, president of the Mokena State Bank and one time grain dealer of Mokena. The spacious edifice was thronged until standing room was at a premium.

Rev. Wm. Kreis, of Dolton, Ill., and former pastor of St. John's and Rev. W. J. Cramer, pastor of St. John's preached the funeral sermons. The flower tributes were many and beautiful.

The exemplary life of the deceased was stressed by both ministers, and especially his work in St. John's church. He was a member of the building committee when the new edifice was under construction.

Three outstanding traits of his character especially emphasized were his generosity, kindness and courtesy.

Wednesday afternoon the board of directors of the Mokena State Bank met and passed the following resolutions:

WHEREAS, It has pleased God Almighty in His infinite wisdom to remove from our midst our late President, associate and friend, William H. Bechstein, whose death occurred on March 6, 1929, and

WHEREAS, We recognize in the life of Mr. Bechstein so much that is worthy of commendation, so many admirable traits of character which were exemplified through his genial disposition, his integrity in dealing with his fellowman, his courteous demeanor always, and his devotion to the interests of our institution; therefore, in testimony to the worth and character of our deceased member, as a heartfelt tribute of our appreciation of his kind life nature and the esteem in which he was held by all who came in contact with him, and as a token to his memory as a wise and conservative counselor as a member of our board and in recognition of the fact that our bank has lost a careful and painstaking official and the community an upright and honest citizen, be it

RESOLVED, By the members of the Board of Directors of the Mokena State Bank, of Mokena, Illinois, in open meeting assembled, that we express our deep and poignant grief over the death of William H. Bechstein, and that we extend to his bereaved widow and children our heartfelt sympathy in their sorrow and affliction; and be it further

RESOLVED, That these resolutions be spread upon the records of our bank and that a copy be sent to the widow and children of the decedent.

Only In-experience Is Being Blamed

BY JOHN T. CLYNE

It is gratifying to know that in the discussions relating to the issue of the \$1,750,000 bond issue, a word of scandal or graft has been charged against the committee who have given the matter thought seem to think the whole transaction just an exhibition of inexperience on the part of those who were supposed to look after county problems, and that the same, soft spoken, high-pressure men, with the sharp pencils, presented a picture that hypnotized a group of amateurs into the signing of a contract that cost the taxpayers of this county a plenty.

It would seem as if what is known as the "Jones Bill" just passed by the Congress of the United States will force the present city administration to adopt new methods in the collection of taxes from taxpayers subject to tax. Few, if any who engage in the distribution of contraband merchandise will risk the penalties inflicted by the new law.

Religious Training School For Will Co.

One day school of instruction for all county, district and city council officers will be held at the First Baptist Church in Mokena, Saturday March 23 from 9 to 4 p. m. There will be no charge. This is one of 18 similar schools directed by the Illinois Council of Religious Education which are being held in all parts of the state during March. There will be no tuition nor registration fee.

This will be the first time in years that a school of this kind has been held in Will County. All our neighboring counties will send county and district officers and it is likely that Kendall county will be over full force.

This school is a very great help in religious education to all officers and pastors, and it is hoped that all county pastors and Sunday school workers will be able to be present.

ORLAND TO HAVE HOT MAYORALTY CAMPAIGN SOON

Orland Park is going to have a red hot village election this spring from present indications. The office of mayor is the bone of contention. It is rumored that among the aspirants for this office are Harry Melchor and Ralph Jennings. P. E. Steffen the present village clerk has been approached by a number of voters to resign as clerk and enter the race for mayor, as they feel he is a capable man and knows the ins and outs of the office. Mr. Steffen is still undecided as to whether or not he is going to try and make this change. He has held the office of village clerk for the past five years.

Chicken Thief Sought by Cops

The chicken thief who beat up Christ Brandt of Orland when the latter detected him in the act of robbing his chicken house, has carried on his operations in the vicinity of Lemont also according to the reports made to the county highway police who are on the lookout for the thief who is said to be a foreigner and is a heavy set bald headed man of about 200 pounds.

Mad Dog Shot at Sedan Prairie

On Monday morning the vicinity of Sedan Prairie became greatly alarmed over the appearance of a strange dog that in every way seemed to be a victim of rabies. Several dogs were bitten but fortunately school was in progress and no children were in the school yard or along the road. In the meantime several who had seen the dog gave chase and in a short time the dog was shot. By the prompt use of the telephone and quick action of the neighbors untold danger was prevented, for no telling what this dog had done before it was apprehended. People should take heed up on seeing any dog or animal acting abnormal.

Hold Spelling Match At Tinley School

Friday, March 8th the annual spelling and declamation contests were held at the Tinley Park public school, Helen Sandridge, teacher.

Evelyn Swartz won the declamation contest, and Margaret Andres, Ruby Simon and Evelyn Swartz the spelling contest. All are in eighth grade.

On Thursday of this week they competed at the township contest held at Oak Forest under the supervision of Miss Catherine McLaughlin.

Orland Collector Job Brings Contest

Town politics in the town of Orland are getting well under way and a warm fight on the office of tax collector is in view. Clarence E. Beagley, an aspirant for this office, was the first candidate to file a petition in the office of the town clerk Fred E. Yunker who is in the race for re-election to this office is now busily engaged campaigning for the office. So far no opposition has been reported for the other candidates on the town ticket who are up for renomination. The annual town election will be held on Tuesday, April 2, 1929.

MOKENA HIGH SCHOOL HOLDS EXAMINATION

Last week, March 6 and 7th students of the Mokena High School had their six week examinations. On March 6, both first and second year students had English and geography. On March 7, the first year class had algebra and general science, while the second year class had geometry and history. Some of the grades were very good, while many were poor. Three papers were graded 100 per cent. Of those three, two were the papers of a second year boy, and one of the papers of a first year girl.

The effect of examination day is wonderful to behold. Some of the boys, who are otherwise very mischievous, get down to business on that day.

SECOND YEAR SCHOOL NOTES

The second year class of the Mokena High school is now studying Julius Caesar, a tragedy by Shakespeare. In Shakespeare's time the language was different from the modern language, and the class has been spending about three days on each act to get all the meaning from it.

It has been the rule in the past years for the second year class to give a play near the end of the school year. This seems to be backed up by a number of "nays" from the boys. If a play is given this year it is to be hoped that it may be given in the auditorium of the new school.

MR. ROBIN IS BACK

Spring is here again, for we have seen Mr. Robin and heard him chirping and singing in bushes and trees.

For the next four years the address of Mr. and Mrs. Herbert Hoover will be No. 1609 Pennsylvania Avenue, Washington, D. C. This address, is better known to the country at large, as the beautiful White House.

It is good to see Mr. Robin's red breast again after the long, cold winter. We suppose that he must have gotten a message by the bird's wireless telling him that the weather is getting warm and the snow is gone. Meadow larks and purple crackles have also come back and flocks of wild geese have been seen.

TYPEWRITING GIVEN AT SCHOOL

At the beginning of the term in September, there were two typewriters in the back room. The pupils often wanted to use them, but were not permitted to unless they had taken lessons. Miss Goetz, seventh and eighth grade teacher volunteered to give lessons, if there would be enough willing to take them. The school board brought 3 more typewriters to school and had the letters put on two of them.

Miss Goetz had about forty typewriting pupils at first, but now some of them have gotten tired of it and dropped it, like they do many novelties. There are now twenty-two pupils taking typewriting. The lessons are given after school, each period lasting half an hour.

DARING DAYLIGHT ROBBERY

A few minutes after one o'clock, Tuesday March 12 as studies were being taken up, a small man in a light gray suit and glasses came into each room and relieved the boys who had been playing for keeps of their marbles and who didn't as quite a collection was taken up.

The man was Mr. Lively, principal of the Mokena High School. The reason Mr. Lively took up the marbles was because of disobedience to a rule against playing for keeps. Mr. Lively locked the marbles in the cupboard to prevent any attempt at rescue. They will remain under lock and key until the end of the school year, when they will be returned to their owners.

Tinley Sport News

BY H. LORENZ

The Tinley Park Girls lost a fast basketball game to the Blue Island "Roamers" Sunday, March 3rd. The scoring was done by B. Vogt and R. Funk. The final score was 11 to 8.

The Tinley Park Lights beat the South Side Buckeroos in a fast and thrilling overtime period. The end of the fourth quarter found the score tied 15 to 15. So it went into a 5 minute overtime. Tinley's defense was unusually good, and their team work was wonderful. A half minute of fast playing resulted in no score then the Buckeroo center sunk a wonderful long shot making it 17 to 15 in their favor. Simon sunk a free throw and brought the score 17 to 16. Another minute of going and Simon sunk a short, bringing it 17-18. Aulwurm sewed up the game by a wonderful long shot, putting Tinley on the big end of a 17-20 score.

TINLEY	B F P
RF Lorenz	10-3
RF Lehmann	0-0
LF Simon	5-10
C. Geobel	2-0
RG Brueggemann	0-1
LG Mager	0-0
LG Aulwurm	1-0
	9-26

The Heavies played follow the leader and also came through with a neat win in a five minute overtime playing a wonderful defence and perfect team work and went thru in the fifth minute for two baskets. The tied score was 23-23.

The Buckeroos boosted their end of the score to 25-23 and Tinley with two baskets made by Aulwurm and Detweiler came thru on the big end 25-27. Let's do the same to the

Roseland's March 17th gang. Tinley won both games Sunday, March 10th defeating Riverdale Lights won 7-17. Heavy's won 30-37. Aulwurm started with 24 points. The girls were disappointed when the Riverdale team did not show up. Watch for big return game with the Buckeroos in Tinley Park Sport news.

Wm. Funk In Race For Re-election as Mayor of Tinley

Village politics are beginning to loom up. A mayor and three aldermen are to be elected. The term of Wm. Funk as mayor expires this spring. Mr. Funk is a candidate for re-election to this office for which news his many friends are glad. Mr. Funk has made a very efficient mayor and should be kept in office so the good work he has done will continue, say his friends.

Tinley Lions Serve Lunch

The Tinley Park Lions Club has been inclined to believe that more interest would be engendered if the social side of the meetings were boosted more. At a previous meeting it had been suggested that a luncheon be served once a month. Last Monday night the social meeting was held and a very sumptuous luncheon was served. All members present were much pleased with the social side of the program and also greatly enjoyed the lunch. Two new members, Ernie and H. Anderson, were taken into the club's membership.

Air Plane terms defined

BY CARLOS HALL

During the past two weeks I have not given any special directions for making planes. That is starting at the first step and taking you thru all the stages to the completed ship. Due to certain things I have not found it advisable as yet to have any plans or drawings printed in the paper and without them it is very difficult to give detailed directions in model making. However, to really start a series of articles on model making it is first necessary to understand the terms used. I might give here a glossary of the most-used terms:

Airfoil section—Cross section of a wing.

Ambroid—A strong flexible cement.

Angle of incidence—Angle of wing to line of flight.

Banana Oil—Bronzing liquid used as dope or as an adhesive for paper.

Center of Gravity—center of weight.

Center of pressure—Point on airfoil section where lift is concentrated.

Chord—Width of wing.

Dope—A liquid used for tightening the fabric on aircraft.

Dihedral Angle—The angle at which the wings meet at the center to give stability to the ship.

Entering edge—Leading edge.

Front edge of an airfoil section.

Elevators—The horizontal controlling surfaces on the tail assembly.

Fin—Vertical stabilizer.

Gap—In a biplane the distance between the wings.

Landing Gear—Wheels, tailskid, shock absorbers, etc.

Motor stick—The beam that carries the rubber motor, thrust bearing and rear hook.

Prop—Propeller.

Rear hook—Hook of wire at one end of motor stick to which S-hook

is fastened.

Rudder—The vertical controlling surface on the tail assembly.

Shock absorber—That part of the landing gear designed to take the shock of landing.

Slip stream—Air thrown back by propeller.

Spread—Distance from tip to tip of wings.

S-Hook—S shaped wire hook used to connect rubber to rear hook and winder.

Tail skid—Support for tail.

Thrust bearing—Bearing which holds the propeller shaft.

Next week I hope to start you out with a simple model that will fly and give you a start to something better.

TINLEY LIONS BACK PUBLIC PLAYGROUND

The Tinley Park Lions Club has been considering the matter of a public playground for the young people of the community and at the meeting of the club Monday night it was decided to lease a plot of ground near the village for this purpose with a view of later erecting a field house thereon so that it can be used for summer and winter sports. A committee has been appointed by Lion President H. C. Vogt to take care of the matter.

Frankfort to Form Pleasure Club

A number of Frankfort men have considered organizing a new club to take the place of the old Frankfort Industrial Club which recently disbanded. It is proposed to hold the regular summer dances this summer again. A meeting is scheduled for Friday night of this week to perfect the new organization.

Fight on For Supervisor

Town politics in Green Garden are getting hot. The big scrap this year will center on the supervisorship. Wm. C. Bettenhausen is out for re-election. Dave Knickeran is also in the race for this office. As both candidates have a big following a very spirited contest is in view and which will be determined at the annual town caucus to be held in the Green Garden Town Hall to be held on Saturday afternoon of this week.

Morning Star Has Busy Month

Following is a report of Supt. P. McCarthy of the Morning Star Mission, Joliet for the month of Feb.

Conversions 51. Free meals 1638. Free beds 666. Free clothing to 121 persons. Free new Testaments 20. Free Gospels 100. Police court and jail visits 25. Relief to 3 families. Paid railroad fares for 5 persons.

Wm. Bell and 3 year old son to St. Louis. His wife deserted them. Four men and one woman were also given help.

February was a short month, but a real busy one, reports Mr. McCarthy.

Must Pay Auto Licenses by Mar. 20

The auto owners of Mokena are now paying up their village vehicle

licenses very fast for the year 1929 and alderman August Hentsch reports that the board will take drastic steps to enforce collection of all village vehicle licenses that are now past due, if they are not paid up by March 20.

NEW TINLEY MARKET NEAR COMPLETION

Adolph Schultz of Homewood is putting the finishing touches to the new market and grocery he is to open in the Goessel building. A large plate glass window is to be installed this week. Painting work of the interior is also to be begun shortly. The electrical wiring and installation of the refrigerating system is about finished. It is understood that Mr. Schultz is putting about \$7,000 worth of equipment in his new shop. The date of the grand opening has not been announced as yet.

Does Good Washer Business

C. J. Sippel of Mokena who is handling washers and electrical appliances is reporting a good business of late. He is putting on a special sales campaign on washers and his adv. in this issue tells of the kind he handles and their merits.

Wannemacher Puts on Sale

George F. Wannemacher, well known Mokena merchant is putting on a special sale of groceries. Read his adv. in this issue.

Tinley M. W. A. To Give Dance

The Tinley Park M. W. A. will sponsor an Easter dance at the Saenger hall in Tinley Park on Monday night, April first. The boys say this will be no April fool joke but will be a real dance with lots of fun and pep. Don't forget the date and bring your friends.

\$100,000 FIRE AT PALOS PARK

Fire, which is said to have been caused by an oil burner, completely destroyed the magnificent home of Mike Flynn at 121st street in Palos Park last Thursday morning.

There was no one home at the time. A caretaker who resides near by discovered the fire about 1:30 o'clock Thursday morning. The fire had swept thru the building and was bursting thru the roof when first seen. The Worth fire department was summoned but could not save the place which burned down to the ground. It is said the property was worth \$100,000. The furnishings alone were valued at \$30,000 and better. Some expensive linen which had not been uncrated also burned.

FIRE AT DANCE HALL

Fire was reported at the dance hall at Goodings Grove on the morning of March 5th. However it was extinguished before neighbors arrived to help put it out.

HE WAS READY! HOW ABOUT YOU?

The "Minute Man" of early Revolutionary days was always ready to cope with any emergency that might threaten his personal Liberty and Welfare. His success, in part, accounts for that great Freedom that is ours to-day.

Apply his principles to yourself. Are you FINANCIALLY ready to cope with either Adversity or sudden Opportunity? Can you face the future and say "Let come what may I'm prepared"? If not—now's the time to open a SAVINGS ACCOUNT with the—

Acidity

The common cause of digestive difficulties is excess acid. Soda cannot alter this condition, and it burns the stomach. Something that will neutralize the acidity is the sensible thing to take. That is why physicians tell the public to use Phillips Milk of Magnesia.

One spoonful of this delightful preparation can neutralize many times its volume in acid. It acts instantly; relief is quick, and very apparent. All gas is dispelled; all sourness is soon gone; the whole system is sweetened. Do try this perfect anti-acid, and remember it is just as good for children, too, and pleasant for them to take.

Any drug store has the genuine, prescription product.

PHILLIPS Milk of Magnesia

Kill Rats Without Poison

A New Extremist that Won't Kill Livestock, Poultry, Dogs, Cats, or even Baby Chicks. K-R-O can be used about the home, barn or poultry yard with absolute safety as it contains no deadly poison. K-R-O is made of Squill, as recommended by U. S. Dept. of Agriculture, under the Comstock process which insures maximum strength. Two cans killed 578 rats at Arkansas State Farm. Hundreds of other testimonials.

Sold on a Money-Back Guarantee. Insist upon K-R-O, the original Squill exterminator. All druggists, 75c. Large size (four times as much) \$2.00. Direct if dealer cannot supply you. K-R-O Co., Springfield, O.

K-R-O KILLS-RATS-ONLY

Facing the Music

"What do they mean by the 'witching hour'?"

"Don't you know? That's the hour when the wife greets you with 'Which story is it this time?'"—TIT-BITS.

Loss of Power

and vital force follow loss of flesh, or emaciation. Dr. Pierce's Golden Medical Discovery is a herbal tonic that enriches the blood, stops the waste of strength and tissue, and helps to build up healthy flesh.

Thin, pale, puny, pimply children are made plump, rosy and robust by the "Discovery." All druggists.

In recovering from "Grippe," or in convalescence from pneumonia, fever or other wasting diseases, it speedily and surely invigorates and builds up the whole system. Read this:

Quincy, Ill.—"Dr. Pierce's Golden Medical Discovery is a wonderful stomach medicine and general tonic. I say this from my own experience—not from hearsay. I recommend the 'Golden Medical Discovery' to be a perfect all-around tonic that will not fail to give entire satisfaction if given a fair trial."—Mrs. D. Pettyjohn, South Bottom Road.

Loosen Up That Cold With Musterole

Have Musterole handy when a cold starts. It has all of the advantages of grandmother's mustard plaster without the burn. You feel a warm tingle as the healing ointment penetrates the pores, then a soothing, cooling sensation and quick relief.

Made of pure oil of mustard and other simple ingredients, Musterole is recommended by many nurses and doctors. Try Musterole for bronchitis, sore throat, stiff neck, pleurisy, rheumatism, lumbago, croup, asthma, neuralgia, congestion, pains and aches of the back or joints, sore muscles, sprains, bruises, chilblains, frosted feet, colds of the chest. It may prevent pneumonia and "flu."

Jars & Tubes

Better than a mustard plaster

Garfield Tea Was Your Grandmother's Remedy

For every stomach and intestinal ill. This good old-fashioned herb home remedy for constipation, stomach ills and other derangements of the system so prevalent these days is in even greater favor as a family medicine than in your grandmother's day.

CHAPTER VII—Continued

"Run fast!" he hissed. "To the water-gate!"

Pontiac's voice thundered a command. The Onondaga muttered:

"The Ottawa chief tells his children to watch the gates and the stockade and kill anyone trying to get out."

Once outside the lodge and we were in darkness. Thirty yards away and we had lost ourselves in a wild crowd of savages. But as we pressed on Pontiac's stentorian voice gradually reached an intelligence here and there; and from different points and in all the dialects of the northern and Ohio tribes, the word was passed to guard the stockades and gates.

"Take the man Beland alive!" roared a voice; and I knew that Beauvais at last had connected my identity up with my French name and that Beauvais now understood all.

"Why this way?" I asked the Onondaga as we reached the stockade on the river front.

"Stand on my shoulders, white brother, and go over," he directed.

"There's the witch-woman—" "She's on the other side. Shall we join her, or face about and die like chiefs?"

I scrambled to his shoulders and went to the top of the timbers. I reached down a hand, but scorning all assistance Round Paw swarmed over the barrier. The two of us dropped to the ground within a few feet of the river.

It was very dark and I was completely bewildered.

"This way, mister," called a low voice.

The Onondaga dragged me after him. My hand rested on a canoe.

"Who's there?" I whispered. "Daughter of witches," was the half-laughing, half-sobbing reply. "But please don't stop to talk, mister."

It was time I scrambled into the canoe, for a chorus of yells was now raised on the other side of the stockade and only a few feet away. I tripped over a rifle as the Onondaga pushed the light craft into the current. I picked it up and found it familiar to my hands.

"Whose rifle is this?" I whispered.

"Hush!" cautioned the girl. Then proudly, "It's yours. I was at the door when the trouble began. I reached in and took it when Mr. Beauvais commenced calling you a spy."

"Talk will kill us," grunted the Onondaga as he pushed a paddle into my hands and began working desperately to reach the slack water along the opposite bank. His warning was timely for I could hear the plop, plop of heavy bodies dropping over the stockade. There came an explosion of mad rage that made my heart wince. The Onondaga proudly informed us:

"They have found Little Wolf in the lodge. I crept under the wall and shot him with his own arrow. He made a choking noise. The Wolf man thought some of those outside would know the truth. There was Pontiac. He talks with ghosts and they tell him secrets. It was he who told Little Wolf to kill me. Pontiac saw me at Detroit and knew my heart was warm for the English. Little Wolf was to shoot me through the hole in the robes when I danced by. If my white brother had not been in danger, I should have shot Pontiac after telling him to march by with the others."

"They are over the wall; they will take canoes and follow us!" I warned. "Mister, I spoiled all the canoes. I could find before going to the house where you was eating. They can't catch us with boats."

"You have done well, little woman. What does Round Paw do now?"

"We were at the opposite shore. We will go up the river instead of down," he answered. "They will think we went down to the Ohio. If the man Beauvais had not come we would have shown them some new magic."

"You knew about Beauvais!" I asked Round Paw.

"The witch-woman told me. She asked my help. She waited outside the house to stop Beauvais from seeing you. It was the witch-woman who said we would leave by water. She was to be outside the stockade by the water-gate. She has a very strong medicine."

"So it was you who saved me, little woman," I said to her.

"Lor's sake! Don't believe nothing that Injun tells you. He saved you; not me. And now I can't go to Canada."

"Wait until after the war. It will be a short war," I told her, little realizing my fallibility as a prophet.

"We must leave the river before the first light," spoke up the Onondaga. "Pontiac will lead the chase. He is a very great man. He knows we took to water. He will send men along both shores to find where our trail leaves the river. He will throw many men between us and Braddock. If the witch-woman takes to the air and flies like a bird, then Round Paw and his brother can walk slowly and laugh at the wild Ottawas."

He was disappointed when I told

him the girl could not fly like a bird and that any plans we made must include her. I told him of my efforts to shield Allaquippa's village from attack and expressed my fear that Beauvais would now do the thing I had convinced him he should not do. This furnished the Onondaga with a double errand to the Delaware village: he must warn the woman sachem and tell Cromit to carry my warning to the army that the Turtle Creek route, though rough, would be free from successful ambushes.

"You will take the same talk, but separate from the bonebreaker," I added. "The woman and I will leave you at the mouth of Turtle Creek and follow it up for a bit and seek the army in that direction. Surely one of the three of us men will take the talk through to Braddock."

CHAPTER VIII

Our Orendas Are Strong

Half a mile below the mouth of Turtle Creek the Monongahela grew very shallow with scarcely more than a ripple of water in places. The three of us held a brief conference

"Set Me Down! Set Me Down!"

and decided that Round Paw should take the canoe to the western bank and make Allaquippa's town afoot. The girl and I waded to the eastern shore.

We left the river in the first gray light of morning and ran swiftly, the girl's thin face revealing her determination not to hinder my progress by any display of weakness; and as we ran she spied out the country ahead while I kept watch over our back-track. Every time I glanced behind me I fully expected to behold a flitting form of a savage. We arrived at Turtle Creek, a short distance above its mouth, without hearing the Indians' cry of discovery.

We forded the creek and paused for a minute for her to rest. Our breathing spell was terminated by a faint halloo. The voice came from far off, and as it was not repeated we did not agree as to the direction. The girl insisted it was north of us, while my ears placed it as coming from the northwest, at about the point on the Monongahela where we had abandoned the canoe. Thankful it was not ahead of us we resumed our flight. We had not proceeded more than fifty rods before the girl, who was in the lead, gave a little cry and came to a halt.

"Where?" I whispered, glaring about to find what had alarmed her. "Among the bramble-bushes," she faintly replied, pointing her short rifle toward a thicket and pressing a hand to her side.

I saw it and directed:

"Go ahead a bit and wait for me."

It was no sight even for a border-bred woman to behold unless grim necessity compelled. After she had passed on I examined the dead man. He had been shot through the body and scalped. He was a Frenchman, for he wore the white uniform with

black facings that distinguished the marines from the troops of the line, whose facings were blue. As the buzzards had not commenced to gather it was plain he must have met death twelve hours back, or in the evening. An ax was tightly gripped in the right hand and there was a gash in the handle where another blade had struck. In the darkness he and his assailant had fought blindly.

I overtook the girl, who was standing before a thick tangle of pea-vines and trailers. When I would have taken the lead in striking this barrier, she motioned me to wait. Time was too precious to wait, but before I could say as much I heard a faint cry.

"I knew I heard it," she muttered. "But 't is only the howl of a wolf."

"Indian lungs are behind that howl," I told her. "It's up the creek." "You think a Injun made it, mister?"

The howl was repeated and sounded clearer.

"I'm positive," I said. As if to guarantee the certainty of my words the signal was answered on our left and again from the direction of the river.

"They are close after us," I whispered. "They're calling to each other to meet on this creek. They'll find our trail. There's but one way open; we must double back by the Frazier cabin, and, if sighted before we enter the forest below it, we can take shelter there and try to stand them off till night."

"If we can find the cabin, we can make a good fight," she stoutly declared.

John Frazier, trader and blacksmith, was a staunch supporter of the English. He had served the colonies more than once as an interpreter, and before coming to the mouth of Turtle Creek had lived for twelve years at Venango, or until driven out by the French in 1753. He had been of assistance to Colonel Washington in 1754 and was commissioned a lieutenant in Trent's command when it was instructed to fortify the forks of the Ohio.

"I can find the cabin easy enough," I assured her, and we swung out from the creek and doubled back. As we ran we could hear the "wolves" howling from three points of the compass their signals sounding clearer each minute and proving that several bands would soon come together at the creek. I began to doubt the wisdom of proceeding farther toward the cabin. I feared we would be cut off and surrounded. To turn our backs to the creek and plunge through the dense forest and trust our lives to our legs appeared as being the best plan.

"Are you able to keep going all day through the forest?" I asked her.

"I am very tired," she confessed. "It's so long since I had a good sleep, mister. There was last night—"

"I know," I broke in, for time was all too short. "You couldn't do it."

A glance at her pinched face told me she was fairly exhausted. And in our haste to make good time we had in spots left signs the savages could easily follow at a run.

"The cabin it must be," I said and trying to speak cheerfully. "Frazier will have plenty of powder and bullets. Perhaps some spare trade guns!"

"You could make it alone through the woods to the army," she said, her words coming in jerks.

"I can make it no faster than you can."

"I'm thinking you're telling a lie, mister," she gravely rebuked, but resumed running.

"A quivering cry up the creek made my skin prickle.

"Hang on to your rifle," I ordered as I seized her and threw her over my shoulder, holding her with one arm and carrying my own gun in my left hand. With a fine spurt of speed I covered several hundred yards. She began kicking and squirming, and demanded:

"Set me down! Set me down! You'll git us both kilt!"

I did as she requested, not because I was too weary to carry her farther, but because her rifle was swinging wildly and striking the bushes and leaving a trail an ox could follow.

(TO BE CONTINUED.)

Many Old Cloisters in City of London

Ancient cloisters, or parts of them, are still to be found in many parts of London; they are reminders of the days when the city boasted spacious monastic establishments.

In St. Bartholomew-the-Great at Smithfield—relic of a wealthy priory—are some bays of the old cloister. A Zeppelin bomb in 1915 helped to reveal a further portion of this, buried under the present ground level.

Cloisters in miniature, with wooden archings, may be seen at Ely place, adjoining the chapel—all that remains of the palace of the bishops of Ely. The cloister-garth is planted with fig trees.

St. Paul's has only a few fragments of its old cloisters. They were de-

stroyed by the fabric of old St. Paul's in 1663. It is at Westminster abbey that you may see the finest cloisters in London. Besides the Great cloisters there are the Little cloisters, where the monks' infirmary once stood, and the Dark cloister that leads to the Norman undercroft.

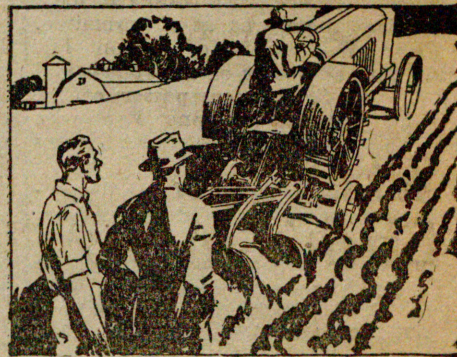

Paint Top and Bottom

In order to last, shelves should be protected with paint or varnish on the bottom as well as the top and sides. Decay is no respecter of surfaces, and will attack and wear away one side as well as another. Therefore, it is best to paint or varnish the entire shelf as soon as it is put up.

ATWATER KENT RADIO

Buy your radio just as you buy

your farm machinery...

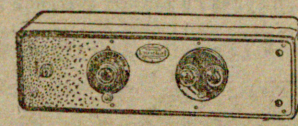

WHO MAKES IT—and how? Is it simple, and easy to keep in order? Will it do its job—and keep on doing it?

Aren't these the questions you want answered before you invest your money in a tractor and everything else you use on the farm?

It's the same way with radio. Here's an instrument your family will depend upon for years and years. You want to know it's always ready to go.

Atwater Kent Radio comes from the largest manufacturer. It is made of better materials than are

ordinarily thought necessary. So strictly is its reputation guarded that one out of every eight workers is a tester or inspector—and every set has to pass 222 tests before it can leave the factory.

Battery Sets, \$49-\$68
Solid mahogany cabinets. Panels finished in gold. Full-vision Dial. Model 48, \$49; Model 49, extra-powerful, \$68. Prices do not include tubes or batteries.

Model 56

The new all-in-one set that fits so beautifully anywhere. Full-vision Dial. For 110-120 volt, 50-60 cycle alternating current. Requires 6 A. C. tubes and 1 rectifying tube. Without tubes, \$97.

Model 40 (Electric), \$77
For 110-120 volt, 50-60 cycle alternating current. Requires 6 A. C. tubes and 1 rectifying tube, \$77 (without tubes).

On the air—every Sunday night—Atwater Kent Radio Hour—listen in!

Prices slightly higher west of the Rockies

Atwater Kent Mfg. Co., Atwater Kent, Pres. 4700 Wissahickon Ave., Philadelphia, Pa.

Nothing New at All

"Don't cry, little boy. You'll get your reward in the end." "S'pose so. That's where I allus do git it."

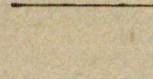

Poor Sight

The car was crowded and many were standing. An elderly man with poor sight was sitting, and before him was standing a young woman who dropped her handkerchief accidentally into the man's lap. Another man saw the handkerchief, touched the old man and called his attention to the handkerchief in his lap, whereupon the old man, looking down and mistaking it for his shirt, quickly shoved it into his trousers and rode peacefully the woman being none the wiser of her loss, as she had not known the handkerchief fell.

Station C-O-O-K

"So you have engaged our former cook?" "Yes, but don't worry—we don't believe a tenth of what she says about you."—Passing Show.

Help Kidneys After Grip

Don't Neglect Kidney and Bladder Irregularities.

HAS grip or flu left you stiff, achy—all worn out? Feel tired and drowsy—suffer nagging backache, headache and dizzy spells? Are the kidney excretions too frequent, scanty or burning? Too often this indicates sluggish kidneys and shouldn't be neglected.

Thousands rely on Doan's Pills. Doan's, a stimulant diuretic, increase the activity of the kidneys and assist in the elimination of waste impurities. Are endorsed everywhere. Ask your neighbor!

Doan's Pills

A Stimulant Diuretic to the Kidneys

Are You Ready

When your Children Cry for It

Baby has little upsets at times. All your care cannot prevent them. But you can be prepared. Then you can do what any experienced nurse would do—what most physicians would tell you to do—give a few drops of plain Castoria. No sooner done than Baby is soothed; relief is just a matter of moments. Yet you have eased your child without use of a single doubtful drug; Castoria is vegetable. So it's safe to use as often as an infant has any little pain you cannot pat away. And it's always ready for the crueler pangs of colic, or constipation or diarrhea; effective, too, for older children. Twenty-five million bottles were bought last year.

Fletcher's CASTORIA

Drink Water If Back or Kidneys Hurt

Begin Taking Salts If You Feel Backache or Have Bladder Weakness

Too much rich food forms acids which excite and overwork the kidneys in their efforts to filter it from the system. Flush the kidneys occasionally to relieve them like you relieve the bowels, removing acids, waste and poison, else you may feel a dull misery in the kidney region, sharp pains in the back or sick headache, dizziness, the stomach sour, tongue is coated, and when the weather is bad you have rheumatic twinges. The urine is cloudy, full of sediment, the channels often get irritated, obliging one to get up two or three times during the night.

To help neutralize these irritating acids and flush off the body's urinous waste, begin drinking water. Also get about four ounces of Jad Salts from any pharmacy, take a tablespoonful in a glass of water before breakfast for a few days and your kidneys may then act fine and bladder disorders disappear.

This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help clean and stimulate sluggish kidneys and stop bladder irritation. Jad Salts is inexpensive and makes a delightful effervescent lithia-water drink which millions of men and women take now and then to help prevent serious kidney and bladder disorders. By all means, drink lots of good water every day.

OLD FOLKS SAY
DR. CALDWELL
WAS RIGHT

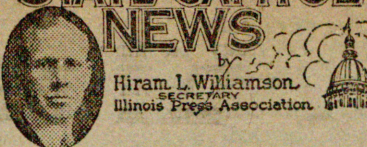

The basis of treating sickness has not changed since Dr. Caldwell left Medical College in 1875, nor since he placed on the market the laxative prescription he had used in his practice.

He treated constipation, biliousness, headaches, mental depression, indigestion, sour stomach and other indispositions entirely by means of simple vegetable laxatives, herbs and roots. These are still the basis of Dr. Caldwell's Syrup Pepsin, a combination of senna and other mild herbs, with pepsin.

The simpler the remedy for constipation, the safer for the child and for you. And as you can get results in a mild and safe way by using Dr. Caldwell's Syrup Pepsin, why take chances with strong drugs?

A bottle will last several months, and all can use it. It is pleasant to the taste, gentle in action, and free from narcotics. Elderly people find it ideal. All drug stores have the generous bottles, or write "Syrup Pepsin," Dept. B, Monticello, Illinois, for free trial bottle.

STATE CAPITOL NEWS

The horse and mule are slowly giving away to this modern machinery age. There are 25,000 less horses and mules on Illinois farms than there were a year ago. The average value has been increased by \$3 per head over that of a year ago.

A balance of \$112,623.47 of the \$175,000 appropriated by the legislature two years ago for emergency repairs and replacements of state-owned buildings cannot be used to remodel state house offices for better efficiency. Attorney General Oscar E. Carlstrom has informed Garrett DeF. Kinney, director of finance.

Population in Illinois penal and charitable institutions increased 1,414 during the year from February 1, 1928, to February 1, 1929, according to Rodney H. Brandon, director of the department of public welfare. The large increase is represented in the institutions for the felons, the number increasing 9.7 per cent.

Adjutant General Carlos E. Black has recommended that the state build only two armories of the dozen proposed and provided for by bills which are now pending in the legislature. General Black suggests that the two armories be built at Cairo and Decatur; he estimates that the state will save at least \$2,000,000 by the proposed plan.

Secretary of State William J. Stratton has announced that all motorists who carry 1928 license tags after March 1 will be stopped by the state highway police and compelled to purchase the 1929 plates. Motorists have already had two months to comply with the law. Applications for the new plates are reaching Mr. Stratton's office at the rate of 10,000 a day.

Minority Leader Michael Igoe, Chicago, has introduced bills appropriating \$165,000 for the completion of the naval militia armory in Chicago and \$1,125,000 for the completion of the Hundred and Twenty-fourth Field artillery armory at Chicago. They have been sent to the committee on appropriations.

The present assembly is puzzled over the Illinois waterway situation. The \$20,000,000 bond issue has been spent and the work is not yet completed. According to the constitution no more bonds can be issued by the present legislature. Additional bonds would have to be approved by voters of the state or officials may attempt to secure federal aid.

No part of a general appropriation of \$100,000 for the purchase of land for state institutions may be used in buying a site for the new state reformatory for women, according to an opinion given by Attorney General Carlstrom to Director Rodney Brandon of the department of public welfare.

Unless Illinois passes a three-cent gasoline tax, it will take twenty years to complete the present hard road system in the opinion of Frank T. Sheets, chief highway engineer. Mr. Sheets believes that with an income of \$21,000,000 annually from the tax the system, as outlined at present, can be completed in six or seven years. New York is the only other state in the union which does not have a gasoline tax and measures are now pending in that state for such a tax. The average gasoline tax in the United States is 3.11 cents per gallon, the minimum being 2 cents and the maximum 5 cents.

Representative Carl E. Robinson's measure, authorizing the state welfare director to lease certain lands in Jacksonville to county fairs or agricultural societies, and the Fahy bill to except candidates for office in cities, villages and towns under 5,000 population from being nominated in a primary, have been passed by the house and sent to the senate.

The corrupt practice act by Representative Childers, Normal, has been sent to the committee on judiciary. The bill limits the expense of electing state officers for each vote cast and state committeemen are limited to two cents. The bill also requires the filing of a detailed financial statement by all candidates.

Attorney General Oscar E. Carlstrom has given an opinion to the state insurance department holding that if the department is unable to determine whether or not securities conform to the statutes, a disinterested party should be appointed for the purpose of appraising the property.

Governor Emmerson has been asked by officials of the village of Bartonville to save that village from the fate of desertion through the re-location of state route 9. The village is built almost entirely on the highway.

Whether or not the act of the last general assembly prohibiting the filing of ouster proceedings against the constitutional officers will be repealed at the present session is still a question. The repeal measure, offered by Senator Woods of Chicago is still before the senate judiciary committee.

Ninety per cent of the land in Illinois is devoted exclusively to agriculture. Thirty-one millions of acres of land are in farms worth in their aggregate more than five billions of dollars. The total value of agricultural products in Illinois each year is second only to that of Texas which has an area of 4.6 times that of Illinois. The Prairie state's agricultural products are worth annually 555 millions of dollars.

Senator A. S. Cuthbertson, Bunker Hill, has introduced a bill in the senate appropriating \$3,000,000 to the department of purchases and construction for flood relief in the Illinois river valley. The Cuthbertson bill authorizes the department to spend one-third of the construction cost, the remainder to be paid by the federal government in accordance with plans to be outlined by the Mississippi river commission.

As a result of the "Buy Illinois Coal" campaign, being conducted by chambers of commerce all over the state, but given special impetus in Springfield by the local chamber of commerce, the shipments of coal from Springfield in January, 1929, increased by 2,574 cars over the record made in January, 1928. If Springfield can accomplish such an achievement, so can every other city in the state where mines are located.

A bill, introduced by Senator A. A. Huebsch, Chicago, requires motor vehicles carrying passengers for hire to file a bond or liability insurance policy with the secretary of state. The present law applies only to Chicago and the Huebsch bill would extend its provisions to all cities and villages in the state.

Senator Richard R. Meents, Ashkum, is the author of a bill increasing penalties for persons convicted of driving an automobile while intoxicated. The fine is increased from \$500 to \$1,000 or imprisonment in the county jail not to exceed six months.

Governor Emmerson was one of twenty-four governors who attended the inauguration of President Herbert C. Hoover. The governor's special train left Springfield on February 28 and returned March 6. Several special trains also went to Washington from Chicago. On the governor's special train were the following:

Governor and Mrs. Louis L. Emmerson, Mr. and Mrs. Harold G. Watson, Secretary of State William J. Stratton, United States District Attorney Walter M. Provine, Miss Bertha Provine, State Auditor and Mrs. Oscar Nelson, H. L. Williamson, Mr. and Mrs. Dana P. Munn, Dr. W. P. Buehler, Barney Cohen, A. M. Shelton, director of registration and education; George B. Arnold, director of labor; Adjut. Gen. Carlos E. Black, Speaker David E. Shanahan, State Representative Homer J. Tice, Greenview; Justice Clyde E. Stone of the Illinois supreme court; Leslie P. Volz, Mr. and Mrs. H. H. Kohn, and daughter, Ralph Bradford, director of conservation and Mrs. Bradford; Superintendent of Public Instruction and Mrs. Francis G. Blair, Mr. and Mrs. Cornelius J. Doyle, Mr. and Mrs. Leo Lowe, Mr. and Mrs. Alvin Keys, Mr. and Mrs. H. H. Cleaveland, Attorney General Oscar E. Carlstrom, Mr. and Mrs. H. C. Wright, State Representative and Mrs. Elmer J. Schmackenberg, Senator and Mrs. Richard J. Barr, Senator James J. Barbour, Senator G. M. Reynolds, Mr. and Mrs. Epler C. Mills, Mr. and Mrs. W. B. Jackson, A. D. Mackie, George E. Keys, W. M. Scanlon, C. F. Rennie, Judge D. T. Hartwell, Mr. and Mrs. Julius Myers, J. W. Flynn, Mr. and Mrs. W. R. James, Senator T. R. Steinert, Col. Richings J. Shand, Captain C. M. Donner, E. C. Gullett, Ernest Smith and O. E. Lemon.

That there are now few farms for rent in the Dakotas, Kansas, Nebraska, Colorado and Wyoming is evidenced by replies just received by President F. E. Williamson of the Burlington railway system to queries sent to local bankers on behalf of persons who desired to rent farms. The results indicate that somebody must be making money out of farms.

The 1929 general assembly is 210 bills ahead of the 1927 session. More than 500 bills have already been offered this year's legislature while two years ago only 290 measures had been introduced. The legislative reference bureau, headed by DeWitt Billman, has drafted about 600 bills for this session but more than 100 of them have not yet been presented. This year's session began four days later than the 1927 legislature.

A bill by Representative Little, Champaign, repeals the act of the session two years ago permitting members of the general assembly to carry stars on the front and rear of their automobiles. The practice has been abused, many members believe, hence the movement to repeal the law.

Stock owners whose cattle are destroyed because of tubercular infection are entitled to indemnity from Illinois independent of any paid by the federal government, Attorney General Carlstrom has ruled.

Construction of a new state hospital at Manteno, for which \$1,500,000 has already been supplied, will begin at once, Rodney H. Brandon, director of the department of public welfare, has announced. The new institution will relieve crowded conditions in other state charitable institutions.

INDISPOSED

THERE are certain times when nearly every woman should accept the aid and comfort of Bayer Aspirin. Not just for the unexpected headache these tablets relieve so readily. Not just for colds which they check so quickly. Bayer Aspirin brings ease on the days too many women still submit to pain that is not natural, not necessary. This relief is perfectly harmless, as in all uses. Remember this! Look for Bayer on the box and follow proven directions found inside.

BAYER ASPIRIN

Aspirin is the trade mark of Bayer Manufacture of Monosodiumsalicylate of Salicylicacid.

U. of I. Dental Unit Among U.S. Leaders

Shows Steady Enrollment Gain in Spite of Stiffening Requirements.

In spite of the fact that the entrance standards of the University of Illinois College of Dentistry, located in Chicago, are being constantly raised, enrollment for the present semester in the freshman class is more than 25 per cent greater than that of the second semester of 1928, according to Dean Frederick A. Noyes, head of the dental college.

"The announced entrance requirements for the University of Illinois College of Dentistry are approximated by only 12 of the 30 or so dental colleges of the United States," Dean Noyes said. "Beginning the first semester of the coming school year, students who enter our school will be required to have had two years of college work. Only twelve schools out of the entire number of dental colleges in the United States can equal this high standard.

"The effect will be that we will have a much higher type of student to begin with," Dean Noyes continued. "They will be more mature and better trained in the art of thinking before we get them. The ultimate result will be that when they graduate from dental college they will have a better equipment than the men who have not had this strong fundamental background.

"By raising the entrance requirements to two years of college work the dental requirements will be on a par with those of the Medical College. Naturally, there may be a slight decrease in the number of students but within a very short time, we will have more students than we have today and they will be capable of better work. The ultimate effect on the profession will be that its general standing will be greatly raised.

"There has been a continual effort to raise the standards of dental schools since the very inception of the idea of such schools. At first a student was required to have only a 'good general education.' A little later came the first real requirement of two years of high school. A little later this was raised to full four years of high school and still a little later we required one year of college work. Now we are entering the period where two full years of college work are required and I believe we are entering upon a new era in the dental profession.

"As I said before, we will get a much higher quality of student by making this new requirement. For many years dentists thought in terms of teeth only. If a cavity was filled the tooth was completely fixed. That was all many dentists knew about the matter and when he had accomplished that result he was conscientiously satisfied. Today we know that the simple filling of teeth is by no means the end of the matter. The close alliance between the medical and dental professions in the fight against disease, has forced each profession into some knowledge of the problems of the other. For this reason it is necessary for incoming students to have a better foundation than ever before.

"Out total enrollment for 1927-8 for the second semester was 139 and the figures for 1928-29 for the same period show ten more students than last year. In the first year class this year there are 75 as against 59 last year; 52 in the second year class against 43 last year, 37 in the third year as against 34 last year, and 34 against 50 in the senior class. The loss by withdrawal and failure is less this year than last. The normal rate of loss is usually approximately 10 per cent."

PHYSICIANS VALUE RESEARCH HOSPITAL

Sending Unusual Charity Cases From All Over State to Chicago.

That doctors all over the state are recognizing the value of the purposes which prompted the state to establish the Research and Educational Hospital at Chicago, by sending to that institution charity patients suffering unusual ailments that the doctors themselves cannot treat, is increasingly evident. The hospital is at present operated jointly by the University of Illinois and the State Department of Public Welfare.

Only those absolutely unable to pay for the services they need so badly are taken in and cared for. These then receive the best care that could be given in the most expensive of private hospitals. Expense is not an item in treating these patients as the doctors are trying to find out the best methods of caring for similar cases that they can pass on the information to the practicing physicians of the state and the students under their charge.

Citizens of the state of Illinois should become better acquainted with this little known institution. They should visit it, see with their own eyes how they are unconsciously, through the payment of their taxes, supporting one of the most humanitarian and truly charitable institutions in the world, and should get the warm feeling of satisfaction that comes to each one from doing a good deed for a fellow man who is down but never out.

Scientist Invents Own Tools

How a scientist is forced to invent new machinery while making difficult or wholly new investigations into the unknowns of science is shown in a multiple exposure x-ray machine perfected by Dr. G. L. Clark, head of the x-ray division of the Department of Chemistry of the University of Illinois. Dr. Clark, who is an expert in industrial x-ray work, was faced with the problem of making a number of small x-ray pictures of materials at the same time. There was no such machine on the market, so he proceeded to build one according to his needs. A single x-ray tube now does the work of many and speeds up the work of his laboratory many times.

☒ Clarence E. Beagley

CANDIDATE FOR

Tax Collector
TOWN OF ORLAND
COOK COUNTY
ILLINOIS

Election, Tuesday April 2, 1929

FRANKFORT

Walter Cheney is very ill in his home here.

Harold Pfeifer left Friday afternoon for Brewster, Ohio where he will have charge of stating a man in service to operate a gas and electric rail laying machine on the Erie railroad. He expects to be gone for one week. He will have charge of laying rail for the E. J. & E. at Gary, Indiana in a few weeks.

Arthur Eisenbrandt will soon move into the Addie Hunt house on White street.

Mrs. John Schroeder, Jr., underwent an operation in Silver Cross hospital Monday morning.

Mr. and Mrs. Lester Erdman of Mokena will move into the Green house this week. Mr. Erdman is employed in the Ray Warning garage.

Wm. Kampe and children and Florence Weichbrodt returned to their home here from St. Petersburg, Florida, Sunday, making the trip by auto. Mrs. John Kampe returned home by train, arriving here on last Friday morning.

Henry Dammann who has been seriously ill the past few weeks is improving, but still remains in bed for this week.

Mrs. George Andrew who was seriously burned last week is improving nicely.

The Ladies Aid of the M. E. church met in the home of Mrs. Lawrence Lorenzen last Thursday afternoon.

Mr. and Mrs. Charles Pfeifer and daughters visited last Sunday afternoon with John Pfeifer and family in Chicago Heights. Mr. Pfeifer who has been ill there for sometime is improving.

Mrs. Walter Pfaff who has been ill for sometime, is improving.

Frank Martis, deputy tax collector of Frankfort, has finished collecting and has turned his books in to the county treasurer at Joliet.

Daily Fashion Hint

S4

SEMI-FORMAL FROCKS

An ideal dress-up or party frock for the younger miss is shown at the left. It may be made in crepe Elizabeth, in georgette or in a lightweight crepe, with the smart collar and the chic gathered flounces of a contrasting or similar colored net. Tulle could also be used with good taste as this material is undergoing a smart revival. The sash and narrow tie-ends at the neck may be made of satin or velvet. The bodice is bloused.

The effective use of satin-back crepe is interpreted in the frock at the right. In silhouette, this model is slenderizing and adaptable to almost any figure. The scarf ends are attached through front slits and are draped at the back. The skirt is attached to a low waistline.

First Model: Pictorial Printed Pattern No. 4605. Sizes 12 to 17 years, 40 cents.

Second Model: Pictorial Printed Pattern No. 4599. Sizes 14 to 18 years, 34 to 44 bust, 50 cents.

We're Literary All Right

The highbrow that argues that we are not a literary people any more should have seen that fat girl lying right smack on her tummy on a bench in the Pennsylvania station the other night reading a vivid magazine. Guess he'd take back them cruel words!—*Wilmington News-Journal*.

History of Orland Park P. T. A.

A brief sketch of the history of the Orland P. T. A. was recently presented in this paper and this issue the closing article of this sketch is present.

The Orland Park P. T. A. organization now boasts a membership of 80 members.

Meetings have been held regularly once a month since organization and each meeting has been a fruitful source of good and an inspiration to the members.

It has been the pleasure and privilege of the organization to have had speakers at the various meetings, several gifted orators and noted men and women among whom were Mrs. Edmonds of La Grange, regional director, the Rev. Paul Sanders, Mrs. DeWilde of Berwyn, regional director, Dr. Heit of Chicago and the Rev. Wm. L. Gorey of Orland Park.

Papers have been read on subjects pertaining to the school, the child and the home. Entertainment has been provided by songs, reading, music and the inner man and woman has invariably been satisfied by the usual splendid refreshments which have been provided by the various members.

Early in the year, dishes and spoons were purchased and are the property of the association.

To stimulate attendance and also to provide a beautiful and substantial adornment to the classroom, the association purchased a picture which is the prize for the month, of the room having the largest representation of parents at the preceding meeting.

An attempt was made to beautify the school grounds but was deferred until this coming spring.

Recognizing the fact that supervised play is an essential element in the training of the child, a playground fund was created, out of which some equipment has already been installed on the school grounds and more is promised as soon as the weather permits construction.

The Infants Welfare Clinic which has come to be an important phase of the civic life of Orland Park, is being sponsored by the organization and is gaining a country wide reputation.

That the association is a stimulus to neighborly intercourse is evidenced by the fact that several times during the year it was the pleasure of the members to greet delegations from the P. T. A. associations of the surrounding towns. Tinley Park, Mokena and Blue Island. Also on several occasions members or groups of the members have returned the calls by visiting these associations.

The Orland Association planned a home talent play, which was staged, acted and directed by the members on March 5th.

To close it is believed that the association has more than justified its right to existence by its record of accomplishment during the year passed. It has succeeded in co-ordinating the activities of the various men and women of the community for the good of the school and of the community; it has succeeded in bringing a better understanding to both the parent and the teacher and an increased efficiency in the watchfulness of both over the children; it has provided a social center for clean, healthful and enjoyable activity—in other words it has taken the community out of a rut, given new and better ideas and stimulated the energies and enthusiasm of the public spirited folk of the community toward things educational.

Thus the Orland Park P. T. A. brings the first chapter of its life's history to a close with strengthened faith and hope and visions of an even brighter future.

Angels Bothered Him

"One night I seen de angels settin' 'round ter keep company wid me," said Brother Williams, "but dey had sich inquirin' ways 'bout 'em, I 'lowed dat de bes' thing I could do wuz ter head fer de highway an' give 'em de whole house!"—*Atlanta Constitution*.

Splendid Legal Library

There are 52,718 volumes in the Alabama Supreme court library. It is said to be one of the most complete legal libraries in the country.

MARLEY

MARLEY CHURCH NEWS

Sunday, March 17, 1929
Sunday School 10 a. m. Church Services 11 a. m. Sunday Evening Club 7:15 p. m.

"How Jesus Taught Men to Live" will be the subject of Rev. A. R. Wakeland's address for Sunday evening at the Sunday Evening Club. The Missionary Society will hold their monthly meeting at the home of Mrs. Julian Gorham, Thursday, March 21. Dinner will be served at 12 o'clock.

Sunday morning the church granted letters to Rev. and Mrs. Sidney Smith. They wish to unite with the First Baptist Church at Marquette, Michigan.

Mr. and Mrs. Uweig of Joliet were Sunday guests at the home of Mr. and Mrs. Julian Gorham.

Mr. and Mrs. Charles Dale and family spent Sunday with Mr. and Mrs. Bellmore in Harvey.

Dave Gillett was a Monday evening visitor at the C. F. Haley home. Mrs. Mabel Haley of Chicago spent the week end at the home of Mr. and Mrs. E. Gillett.

Mr. and Mrs. Stanley Coe were the Sunday guests of Mr. and Mrs.

Edward Marshall.

The Misses Caroline and Helen Tilsy were callers at the Joliet Library Saturday morning.

Mr. and Mrs. Mervin Moores spent the week end with Mr. and Mrs. Jesse Marshall.

When ever it rains it pours but in some kind of showers you don't need an umbrella or rain coat according to Miss Iva Spiecher who was the recipient of many beautiful and useful gifts at a shower for her at the home of Mrs. Ralph Bell Saturday afternoon. Upon the invitation of Mrs. Ralph Bell and Miss Florence Cutler who acted as hostesses. About thirty guests came to wish Miss Spiecher well in her approaching matrimonial voyage with Mr. Everett Bell. After the party had enjoyed several interesting games, the surprise packages were opened in the presence of the guests, after which a dainty luncheon was served.

Sunday guests of Mr. and Mrs. Charles Bostrom were Mr. and Mrs. Thomas Cooper of New Lenox, Mr. and Mrs. Ed. Lemperies of Chicago, Mrs. H. Johnson and Mr. and Mrs. A. Kohl of Joliet.

change.

CAN ILLINOIS AFFORD 6 MILLION A YEAR FOR ITS UNIVERSITY?

LOOK AT IT THIS WAY:

- 1-10 of the State's candy bill, or.....
- 1/2 of the year's expense of advertising one brand of cigarettes, or.....
- 1/3 of the cost of the State charitable and penal institutions, or.....
- 3/100 of 1% of the estimated property valuation in Illinois, or.....
- Less than the actual cost of a 50-mile trip in Illinois automobiles, or.....
- \$1 of each thousand of the value of Illinois manufactured goods, or.....
- 8¢ a ton on coal mined in Illinois, or.....
- 1/2 of the State's coffee bill, or.....
- 1 1/2 % of value of Illinois farm crops, or.....
- 2¢ per bushel on Illinois corn, or.....
- 4.6% of all State taxes, or.....
- Approximately 82¢ per inhabitant..

Would Meet the University's Needs!

Illinois Checking Human Wreckage

Research Hospital Cares for Poor of State; Teaches Young Doctors.

What is the State of Illinois doing to check the stream of human wreckage? It is doing a great work, but comparatively few really know about it.

One of the most unique arrangements for the care of that group of sick and crippled who cannot afford medical service, for the training of young doctors, and for research into the cause and prevention of disease exists in Chicago—in the heart of the world's greatest medical center—yet it is practically unknown even to Chicagoans themselves. The Research and Educational Hospital operated co-operatively by the University of Illinois College of Medicine and the State Department of Public Welfare is this unusual institution. This group is located just south of the Cook County hospital plant.

Scarcely had the first unit been completed and the equipment set in place when the backwash of the advance of civilization began to sweep through the portals of the hospital. The maimed, the sick, and the halt sought the solace their state held out to them. Where misfortune has wiped away position, home and the ability to maintain the former standard of living, and sickness and disease has come in the place of affluence, thousands of citizens of the state have become almost public charges unable to pay for medical attention they so badly need. The Research and Educational Hospital is the answer to their prayers.

Only those who are unable to pay for the medical and surgical attention they receive are taken in. There are more of this category than the institution can possibly care for. More than 50,000 came seeking aid during the past year. Destitution and actual want stalked with each of these suffering. Without the supporting hand of the state, gesturing through these two humanitarian departments, much, if not all of this human driftwood would sink into oblivion and the Potter's field, or fill the poorhouses and clog the institutions of charity privately maintained.

The Research and Educational Hospital has a threefold purpose. The first, of course, is the cure of the ill of the poor. That in itself is of primary importance, but scarcely less important is the second purpose, that of instructing young doctors so that they may go out into the state and care for the health of the public. The third and last is scientific investigation into the causes and cure of disease with a view to its prevention and effective remedy. The future benefit in this instance cannot easily be realized. The check and prevention of yellow fever and diphtheria are only two cases that result from this type of work.

For the accomplishment of these purposes there are provided laboratories, libraries, class rooms, clinics and hospital facilities, manned by some of the finest medical, surgical and research talent in the country, all housed within the walls of this great institution of mercy. Students, guided by their physician-instructors, attend the sick, watching over them, treating them, and through their close association with the actual cases of suffering learn the fundamentals of the great profession of medicine. In the laboratories, some of the most eminent research scholars of the country delve into the mysteries of disease and the malfunctioning of the human mechanism, and try to solve the problems of cure and prevention.

U. of I. Grad Inventor

The man who solved the problem of firing a machine-gun between revolving airplane propeller blades, and who recently invented one of the most talked-of features of the present day automobile motor—the "Invarstrut piston"—is a product of the laboratories and class rooms of the University of Illinois. He graduated from the university in 1916.

Mr. Nelson's first notable invention is known as the "Nelson gun control" and his second, the "Nelson type piston". Seventy per cent of all pleasure automobiles today are equipped with aluminum alloy pistons and the Nelson "invarstrut" piston is used in the majority of them.

One hundred seventeen more students are registered at the University of Illinois in both the Urbana-Champaign and Chicago departments this year than in 1927-28, figures for the 1928-29 sessions compiled by the registrar show.

STATE CANDY BILL 10 TIMES UNI. NEEDS

Only 3-100 of 1% of Estimated State Property Value Required.

The total cost of such an institution as the University of Illinois is large. It cannot be otherwise. But when divided among the individual inhabitants and the various productive enterprises of a great state, the expense at any one point is not burdensome; it is even almost negligible.

For example, the University of Illinois with its staff of 1,400 people operating as a research institution and bureau of information and at the same time serving more than 14,000 students, costs the State only about eighty-two cents a year per inhabitant. This means about four per cent of all State taxes. It is about one-third of the cost of the charitable and penal institutions of the State which yield no direct income and but little indirect. It is about three-hundredths of one per cent annually on the estimated property valuation of the State.

It would mean about eight cents a ton on the coal mined in Illinois, or one dollar on a thousand (one-tenth of one per cent) on the total value of manufactured goods of the State. It would mean about four-fifths of the coffee bill of Illinois.

If the farm paid it all, it would be one and a half per cent of the value of the crops, or two cents a bushel on the corn crop. Something less than the actual cost of a fifty-mile pleasure trip taken by the automobiles in Illinois would pay the outlay for the University.

With a billion dollar candy bill for the nation this year, Illinois citizens will pay, on the basis of population, approximately one-sixteenth or \$50,000,000. The University of Illinois asks less than a tenth as much as her citizens spend for sweets.

MUNY LEAGUE PRAISES AG. EXTENSION WORK

Report Shows Much Good to Farmer Through Work.

Success of the agricultural extension work carried on throughout the state by the College of Agriculture, University of Illinois, in the interests of more profitable farming and happier homemaking has just recently come in for national recognition in a report of the National Municipal League's committee studying federal aid to states.

Illinois, with its high standards for county farm advisers and other agricultural extension workers, was singled out as the state in which the quality and results of agricultural extension stand out brilliantly from the mediocrity produced under lower standards for this work.

A review of agricultural extension work in Illinois as carried out under the supervision of the College of Agriculture, University of Illinois, reveals the evidence which led to the conclusion of the league committee.

As part of the extension organization there are now county farm advisers in all but six of the 102 counties of the state. These workers are fortifying the position of the state's farmers in an exemplary way through no less than 50 definite better farming projects. These projects are outlined by the extension service of the college and each farm adviser promotes selected ones with the help of subject-matter extension specialists of the institution.

More than three-fourths of the 14,000 students registered at the University of Illinois at Urbana-Champaign and Chicago are affiliated with some religious organization. One could not say from this that university students are irreligious.

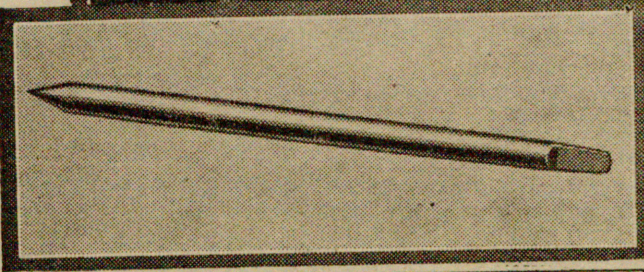

Men outnumber women at the University of Illinois nearly four to one during the 1928-29 sessions. These figures include both the Urbana-Champaign departments and those in Chicago.

New Type of Magnetic Probe A Valuable Aid to Physicians

Scientists Have Developed a Small Permanent Magnet of Unusual Strength for Use of Practitioners

The Magnetic Probe Pulls Out a Steel Sliver

A Magnetic Probe Several Times as Strong as the Best Permanent Magnets Heretofore Available.

By J. O. PERRINE

THE humanitarian spirit of the telephone's inventor, Alexander Graham Bell, which marked his lifelong activity in behalf of those with lost or impaired hearing, has frequently been reflected in many of the auxiliary products of telephone development. From the research of the Bell System scientific laboratories and co-operating medical experts have come the electrical stethoscope, the artificial larynx, the audiometer and aids to the deaf. Now comes another humanitarian instrument—the magnetic probe. It has nothing to do with telephony, as such, but is a by-product of developments in the manufacture of telephone apparatus. It is a beneficent instrument, made available to physicians for the removal of steel slivers from the skin or the eye without the necessity of surgery.

Magnets Everywhere

Magnetic instruments play many and conspicuous roles in everyday life. Perhaps the oldest magnetic instrument is the compass needle of the navigator. For many centuries compasses have pointed the direction for the helmsman as he guides his vessel to the far corners of the earth over the seven seas. The inductor compass, more recently developed, was used by Lindbergh on his heroic flight across the Atlantic. Like the compass needle, it also depends on the earth's magnetism, although in a different manner. The telegraph sounder is another magnetic instrument, as is the telephone receiver. A magnet in some form or another is an indispensable part of electric bells, induction coils, magnetos for automobile ignition and countless other appliances used daily. Strong electromagnets are an essential part of the great generators of electricity which light our homes and drive street cars and trains. Great masses of iron are lifted by electromagnets of special design in the iron and steel mills of the country. Sometime, magnets of similar design are mounted on the rear of auto trucks and supported close to the surface of the road. As they pass slowly along the motor highway, nails and all sorts of sharp-cornered pieces of iron fly to the tight embrace of the magnet. With the road thus swept with a magnetic broom, the distressing experience of a puncture is less likely to delay the motorist on his week-end trip.

Physicians' Use of Magnets

For sometime a similar sort of magnet, namely the electromagnet, has aided the physician in removing iron or steel particles embedded in the skin or muscular tissue, or in the eye. Just as nails on the highway are lifted up and even pulled out of the asphalt of the public highway, so the tiny steel slivers slowly but surely are pulled out of the hand or the eye-ball. The strange and ever marvelous force exerted by the magnet extracts a tiny piece of iron with deft and invisible fingers.

Heretofore, permanent magnets, that is, a bar of iron alone, could not be made strong enough to do the trick. Ordinary horseshoe magnets and bar magnets, of course, pick up iron, but for the purposes of the physician they did not exert sufficient pull. So the electromagnet had to be used; that is, a bar of iron was put inside a coil of wire connected to an electric battery. By increasing the electric current the pull could be made stronger and stronger. These electromagnets were big and heavy and awkward to handle. Necessarily, the patient had to be brought to the magnet. The magnet could not readily be taken to the patient.

The need for a small, handy form of magnet, with a lot of pull, was a frequent topic of discussion among physicians and first-aid specialists.

New Magnetic Material

The development engineers of the Western Electric Company, which manufactures telephone apparatus for the Bell System, had

been studying magnets and magnetic materials for many years. Magnets, all sorts of magnets, small and big, permanent and electro, strong and weak, are to be found in the telephone system in more than the proverbial thousand and one places. Obviously, these engineers knew considerable about magnets and magnetic materials. Following the suggestions made by medical advisers as to the size and shape of the proposed probe, these researchers produced a magnet with two and a half times as much pull as the strongest permanent magnet previously possible. Of course, the secret of the achievement is the material comprising the magnet, namely, cobalt steel. Cobalt is a chemical element, and with iron and nickel comprises the more magnetic materials found in Nature. Cobalt, however, does not exhibit magnetic properties in so high a degree as iron. However, at times, Nature can be beaten at her own game, and using a mixture, an alloy of cobalt and steel, a magnetic material was discovered which has most extraordinary magnetic properties. Permanent magnets of unusual strength resulted.

The New Magnetic Probe

With this new cobalt steel magnet a probe about the length and diameter of an ordinary pencil was designed. One end is flattened for use in extracting bits of iron from cuts while the other end is pointed like a sharpened pencil for particular application in eye cases.

The first aid specialist and the physician are now able to add a new instrument to their healing kits. A hard and lifeless piece of iron thus serves as a great boon to the injured. Cobalt steel is not found in the natural state, but emerged from the scientific laboratory as a result of unremitting labor and study by those who were zealous in research.

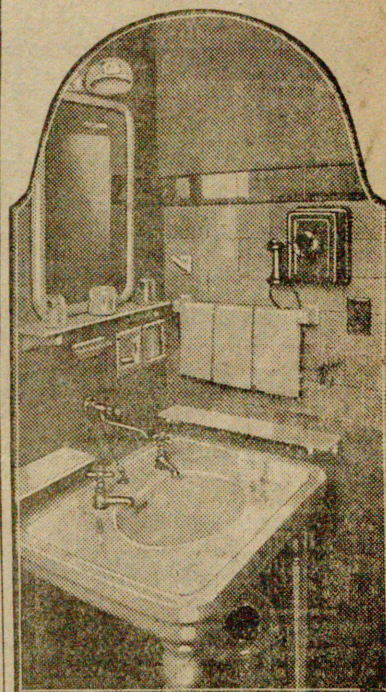

SCHOOL MA'AM RUNS TELEPHONE COMPANY

Massachusetts Pedagogue Manages System in Addition to Her Educational Duties

There's a telephone company in Massachusetts whose lines stretch out into the country for miles that is owned and operated by a woman—and a red-headed school teacher at that. She is Miss Catharine M. Connor and the company of which she is president, secretary and general manager is known as the Highland Telephone Company. It is located in Cooleyville, Mass., and serves subscribers in seven towns. It's a well managed concern and not only is its president, secretary and general manager a woman, but its treasurer is Miss Mary Vaughn, no less efficient than the head of the company.

Not only is Miss Connor, president, secretary and general manager of the company, a teacher in the small white schoolhouse near her home, but she spends her nights on telephone duty. Her bed is located in the little operating room off the kitchen, and when a subscriber calls in the middle of the night for a doctor or for some other reason, her gong rings and she rises and puts up the connection. Around about 5:30 in the morning, when the milk farmers in her territory start telephoning, then her day really begins. There is a big rush of calls until breakfast time, after which a local boy comes in and takes care of the board throughout the day. In the evening a high school girl mans the switchboard, after which Miss Connor handles it.

TELEPHONE CONVENIENCE FOR HOTEL'S PATRONS

A Telephone in Every Bath Room

Nowadays, telephones are a part of the equipment of the guest rooms of every first class hotel. A telephone in every private bathroom, however, is an innovation, but one that may become a part of the furnishings of the newer, recherche hotels which cater to the comfort and convenience of their guests in the last detail. One of the newest, distinctive hotels of this class in Washington, D. C., designed to carry personal service to its patrons to the nth degree, has a telephone in every bathroom.

GROWTH IN JACKSONVILLE

Jacksonville's first telephone exchange was established on May 24, 1880, and was served by two boy day operators and one night man. Today, 185 girls are required during the day and 17 on night duty to take care of more than 25,000 telephones which serve the city.

COLORADO'S RAPID TELEPHONE GROWTH

The growth of the telephone in the state of Colorado is shown graphically by the fact that thirty years ago a telephone book was published which listed all the telephones in the state of Colorado and in northern New Mexico. This book weighed six ounces, while the weight of the last directory for the city of Denver alone is one pound and six ounces. The 1898 volume showed Denver with approximately 2,160 telephones, whereas there are today in the city over 86,000 instruments.

NEW YORK'S TELEPHONES

In New York City there is a greater concentration of telephone wire than in any other community in the world. About 8,000,000 miles of wire is required to serve the telephones in New York, this being 13 per cent of the wire mileage of the Bell System. Ninety-five per cent of this wire is in underground cable.

QUAKER CITY GETS OUT BIG VOTE BY TELEPHONE

The telephone was utilized in Philadelphia to bring out a large vote on election day. A special bureau of information was opened by the Registration Commission. This bureau was organized to facilitate the registration of more than 30,000 citizens who had never voted before, so that they might take part in this year's presidential election. It was available to all citizens, irrespective of party affiliations, and was designed to encourage voters to go to the polls on election day. The fact that information for such voters was available by telephone was specially stressed by the Commission.

A new toll cable, costing \$1,000,000, has been completed and placed in service between Milwaukee and Madison. The new line was built because of the increase in business between the two cities and intermediate points and required a year and a half for its construction.

TAKE UP COLLECTION TO PAY FOR TELEPHONE CALL

A telephone call across the Atlantic which was paid for by the town to which the call was sent, is one of the recent unique features of the radio telephone service between this country and Great Britain.

Mr. C. Watling of Norwich, England, attended the International Rotary Club convention at Minneapolis in June. Before his return home he put in a telephone call from the Waldorf Astoria Hotel in New York to the Lord Mayor of Norwich and told of his experiences at the convention, his impressions of America and the plans he had made for his return.

The expense of this call at the rate of \$15 per minute had previously been raised by the citizens of Norwich, as this was the first call that had been made to the English town across the Atlantic and its citizens all wished to have some part in the event.

CABLE PULLERS' CHANTEY IS NEW SOUND IN LONDON

A few hundred years ago London resounded with the strange cries of merchants hawking their wares about the streets, but in recent years these cries have almost totally died out. Many of these cries were famous, as each type of goods had its distinctive cry, usually a short couplet or verse, describing the articles for sale.

Recently, however, a new cry has been attracting the attention of Londoners: a rhythmic, wailing cry of "Yahmah-ho! yahmah-ho!" This is sung by gangs of men pulling telephone cable through the ducts. It makes the work easier and helps the men to heave together on the cable.

In America the same work is usually performed by running a small steel rope through the ducts, to which the cable is attached, and then winding in the steel rope on a power-driven winch mounted on a motor truck.

Our Subscription Premium Offer MITTEN DUSTER

FITS THE HAND LIKE A GLOVE

The Duster of a Thousand Uses

With this Big Fluffy Chemically Treated Mitten Yarn Duster, a housewife can do her house cleaning in less time and with less effort, than is required with ordinary dusters. It does not only absorb and retain the dust as a Magnet attracts steel,

but with the chemical elements retained in the Yarn by a patented process it cleans and polishes furniture and other woodwork around the house in one operation, leaving all cleaned surface with a lustre as beautiful as when new.

A CAR OWNER'S DELIGHT

It does not scatter dust from one place to another as common dusters do, but absorbs and retains it; and when soiled can readily be washed like any other yarn garment, and when dry is as clean and large and fluffy as when new.

With the aid of an Auto Mitten Duster a car owner can clean and polish his automobile in a few minutes, without soiling his hands or

clothes; just once over and the car is spick and span. It makes frequent washings unnecessary, and as it takes time and money to have your car washed, the amount saved is worth while.

This Mitten Duster is also used extensively in schools, and institutions and all public buildings as well as in stores and offices.

FREE with each new or renewal subscription to the News-Bulletin at \$1.50 per year.

Local Headquarters for the Famous Red Top STEEL FENCE POSTS

RIGHT here is the place to
get those Red Top Steel
Fence Posts you see advertised
in your farm papers.

This Red Top is a proved post—tested by farmers in thousands of fence lines. It's got a mighty good record right around here. The studded Red Top is extra strong without a weak spot in it. It has a long life. You can drive over 200 of them in a day with the One-Man Driver. The Handy Fasteners that come free with the posts are made so as to hold the wire securely, thus doing away with restapling and restretching.

The Red Top post is guaranteed by the maker. Their guarantee is worth one hundred cents on the dollar. We are authorized to make all adjustments. So we put our own personal endorsement and guarantee on every Red Top we sell.

It's just that kind of an article we like to handle in its field. One of the main points we look at in our buying is to get the makes of goods that give our customers the most value for the money. We don't expect to prosper unless you get a good big dollar's worth for every dollar you spend.

Drop in and see us when you're in town. Prices are mighty reasonable just now on fencing materials and many other special items.

Red Top Double Strength Studded Tee Steel Fence Posts

Frankfort Grain Company

FRANKFORT, ILLINOIS

Our Own Folks Sell Our Service

WITH the aid of its 31,000 employees, the Illinois Bell Telephone Company is conducting an active educational and selling program to instruct telephone users in the best and most effective ways of using their service and in an effort to put adequate telephone facilities into every home.

Good telephone service requires: (1) that telephones be answered promptly and users speak distinctly; (2) that every home be equipped with adequate and conveniently located telephone facilities, for a telephone always within easy reach means prompt answering; (3) that more persons install telephones in their homes, for the greater the number of persons who can be reached by telephone the more valuable the service.

A telephone extension may be installed to advantage in almost every room in your house or apartment. The cost of telephone extensions is small.

PROBATE NOTICE

ESTATE of William H. Peters, deceased.

The undersigned having been appointed Executor of the last Will and Testament of William H. Peters, late of Frankfort, in the County of Will and State of Illinois, deceased, hereby gives notice that he will appear before the Probate Court of Will County, at the Court House in Joliet, at the April Term, on the first Monday in April next (being the first day of said month), at which time all persons having claims against said estate are notified and requested to attend for the purpose of having the same adjusted. All persons indebted to said estate are requested to make immediate payment to the undersigned.

Dated this 20th day of February, A. D. 1929.

MAX F. HAASS,

Executor, as aforesaid.
Albert H. Krusemark,
Attorney.

PROBATE NOTICE

ESTATE of Magdalena Yunker, deceased.

The undersigned having been appointed Executor of the last Will and Testament of Magdalena Yunker, late of Mokena, in the County of Will and State of Illinois, deceased, hereby gives notice that he will appear before the Probate Court of Will County, at the Court House in Joliet, at the April Term, on the first Monday in April next (being the first day of said month), at which time all persons having claims against said estate are notified and requested to attend for the purpose of having the same adjusted. All persons indebted to said estate are requested to make immediate payment to the undersigned.

Dated this 20th day of February, A. D. 1929.

HENRY YUNKER,

Executor, as aforesaid.
Albert H. Krusemark,
Attorney.

Photo Shows:—Fred A. Hartley, Jr., of Kearney, N. J., will take his seat in the next House of Representatives in Washington, as the youngest member who ever has sat with that body. One must be at least 25 to be a Congressman. Mr. Hartley will be 26 on April 15th next.

ORLAND PARK

About two o'clock last Wednesday afternoon, the roof around the chimney on the Christ Yunker residence caught fire from a defective chimney. The fire department was called out and quickly had the fire under control so no serious damage was done.

The Bible Training School of the Chicago Southwest Community Parish has opened at the Orland M. E. church and has been well attended.

The P. T. A. met in monthly business session at the home of the president, Mrs. H. Adelle Cooper Tuesday evening.

Mrs. Storz who has been ill for sometime is somewhat improved.

Mr. and Mrs. Edwin Cooper of LaGrange were guests of Mrs. H. Adelle Cooper Sunday.

The monthly meeting of the P. T. A. was held Thursday evening at the Orland Park school auditorium. Prof. Yarrow of Chicago was the speaker of the evening.

Mrs. Clarence Beagley visited in Chicago Tuesday.

Dr. W. R. Schussler is in Texas in the interest of his real estate there.

The village board met Monday night with only four members present, which was enough for a quorum. Only routine business and passing on claims was transacted.

Soon as the frost is out of the ground work will be resumed on the Southwest Highway. The bank on the west side of the Wabash is to be cut down and the earth used for filling at the north end. The Wabash moved their telegraph poles further in on their right of way sometime ago.

James E. Creer has made a note worthy improvement in the interior of his grocery and market and has made the place very attractive and inviting.

With the warming up of the weather the baseball fans are beginning to think of playing ball. Orland will have another crack ball team this year according to present plans.

Farmers Union Wins Suit To Enforce Contract

The Illinois Farmers Union was granted a temporary restraining order on March 9th by Circuit Judge Arthur W. DeSelm of Kankakee, which prohibits W. Langlois, prominent farmer of Manteno from selling grain, live stock or other farm product contrary to the terms of his Union contract pending further hearings at the May term of the Circuit Court. This is the first action of the kind in which the Farmers Union was required to restrain a member in Illinois.

The bill shows that Langlois joined the Farmers Union in 1927 agreeing to market all products of his farm cooperatively for 10 years. The contract became binding in October 1928 at which time more than 55 per cent of all farmers in the Manteno trade territory had entered into similar agreements and set up cooperative marketing facilities to sell their grain, live stock etc together thru the Farmers Union.

The violation cited against Mr. Langlois was the sale of 2800 bushels of corn raised on his Kankakee county farm. This grain was turned over to private dealers instead of being delivered to and sold by the Grain Sales Department of the Illinois Farmers Union. Langlois failure to abide by his agreement brought the court action with claim for \$297.50 liquidated damages to the cooperative association plus all costs of litigation to enforce the contract. The restraining order forbids Langlois to market any farm commodities contrary to contract pending the hearings at the May term of the Circuit Court.

This action is of tremendous importance to thousands of Farmers Union members throughout Illinois who have signed marketing agreements and set up sales agencies to handle their products cooperatively. The courts have repeatedly upheld the validity of such agreements as the one used by the Farmers Union in securing control of farm products for its farmer members in the state of Illinois. The principle of liquidated damages where the member commits a violation is based on a reduction of the volume of sales and the increased cost per unit to farmers who deliver and sell thru the association. A number of communities in central and northern Illinois are signed up more than 80 per cent under the Farmers Union marketing agreement and cooperative sales associations are handling grain, live stock, dairy products, etc., with remarkable satisfaction and success.

The Farmers Union was represented before Judge DeSelm by attorneys Lynch and Donovan of Chicago. The bond required on issue of the temporary restraining order was signed by C. C. Schreffler and Joseph Mann, both contract members of the Farmers Union of Manteno.

MOKENA

ST. JOHN'S EVAN. CHURCH
Rev. W. J. Cramer, Pastor
Sunday school, 9:30; Divine service 10:30. Lenten services every Thursday evening at 7:30.

Tuesday, March 19th Big Baseball Game! St. John's Brotherhood vs. St. John's Young People will shine in the world series. All baseball fans are invited. Bleachers are free. Hot coffee and sandwiches will be served to the fans. Come, bring your children and your sweet hearts and watch the home runs by the famous players of both teams. Don't miss it.

Presentation and examinations of Confirmation Class 1929 Sunday evening at 7:30

Confirmation Reunion on Palm Sunday Evening at 7:30. The presidents of all confirmation classes, appointed by the pastor, will give the history of each class. The oldest member confirmed in St. John's church present that night will be presented with a beautiful bouquet of flowers by the pastor. Also the next five oldest confirmants of St. John's church will receive a beautiful present in memory of their confirmation. Miss Boyd of Joliet will sing two beautiful numbers, also Mr. Tonn will sing "The Holy City". Come early and get a comfortable seat. Special music will be provided for the occasion by our organist, Mrs. E. P. Krapp.

MOKENA M. E. CHURCH

Glen T. Beatty
Church school 10:30 a. m.
Evening Worship 7:00 p. m.

Are you attending church some where during the Lenten Season? We invite you to be with us in our evening worship services. The sermons are centering around the life and teaching of Jesus during these weeks preceding Easter. We invite you.

Make your plans to attend our early Easter Morning Service, 7:30 a. m. Our entire attention will be given to this service on that day. How very symbolic that we should come to Jesus as the women came to the tomb on Easter Morning so long ago. There will be opportunity for joining the fellowship of our church, for accepting Christ, for Baptism. We welcome you!

The Ladies Aid is planning a pre Easter sale of handwork and bakery goods. Watch for the date! Mr. and Mrs. Bates, Miss L. A. Justus and W. E. Houchin of Chicago and Mr. and Mrs. Louis Durringer of Roseland were guests of Mrs. John Semmler Sunday.

The members of the 500 club entertained their husbands at a party at the Ona T. McGovney home on Friday night.

Mr. and Mrs. George Cooper and son who were called here by the death of Mrs. Cooper's father, W. H. Bechstein, returned to St. Petersburg, Florida, Monday evening.

Mrs. Don Hall who has been ill, is improving.

George F. Wannemacher who has been ill is improving.

John Martin is making repairs on his house.

Let Us Laugh

Miss Jessie Diviny and Fred Browne were married at Hoxie, Kansas, some weeks ago. They are both very highly respected and we did not suspect it until yesterday. —Wilsonville, Neb., paper.

"Mamma, if you had met Colonel Lindberg before you met pop, would you have married him?"
"Why, no, dear, of course not."
"My golly, you're dumb, Ma!"

Doctor—"Where shall I vaccinate you?"

Modern Girl—"Oh, anywhere; its bound to show."

Monument to Marketwoman

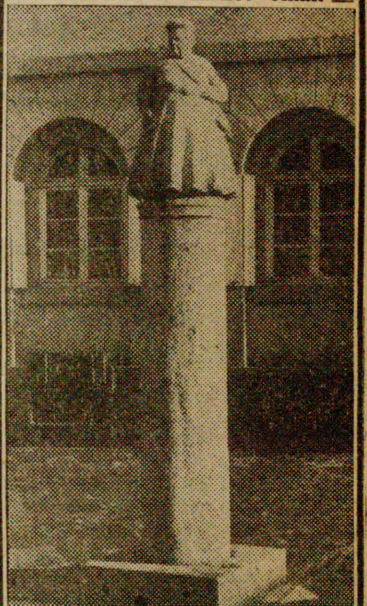

PHOTO SHOWS:—Karlsruhe's (Germany) unique and new monument, by the internationally famous sculptor, Tory. The monument is an "heroic bow" to the memory of that most useful of matrons, the "market wife"; the good lady, who has served as a useful instrument in the distribution of food and staples.

"He who goes down into the bat-
tle of life giving a smile for ev-
ery frown, a cheery word for ev-
ery cross one, and lending a help-
ing hand to the unfortunate, is
after all, the best of missionaries."

GOOD THINGS TO EAT

When one cannot procure the fresh
grapefruit, the canned is very delicious

Grapefruit Salad.
—Arrange in rows
on head lettuce or
in nests of lettuce
and serve with

french dressing and a sprinkling of
finely shredded almonds.

Orange Ambrosia.—Peel and slice
oranges in very thin slices. Arrange
in a glass bowl and sprinkle with fresh
grated coconut and sugar. Let stand
for an hour and serve.

Jam Dainties.—Take one-fourth cupful
of butter, one-half cupful of sugar,
cream together, add two tablespoon-
fuls of grated chocolate melted, one
tablespoonful of sugar, one beaten egg,
a tablespoonful of boiling water, one
cupful of flour sifted with one tea-
spoonful of baking powder. Mix and
chill. Roll and cut into small cookies.
Ice with boiling frosting and jam.
Put together in pairs.

Ham With Pineapple.—Take a slice
of ham one inch thick and sprinkle
with flour. Melt a little of the fat
and brown the ham well on both sides.
Pour one cupful of pineapple and one-
half cupful of water over the ham and
bake slowly until tender. Remove the
ham and serve with the sauce
around it.

Spinach With Bacon.—Cook spinach
in just the water which clings to it
when washed. Cook in a heavy kettle
well covered for ten minutes, season
with salt, pepper and one-fourth cupful
of lemon juice or less—enough to
season. Add crisp, well cooked dry
bacon, broken into bits; stir well and
serve.

Mackerel With Lemon Butter.—Split
and bone a mackerel and wipe with a
cheesecloth. Broil first on the flesh
side and then on the skin side on the
gas or over coals. Make lemon butter
by mixing lemon juice with butter and
spread on toast. Cut the fish and ar-
range on the buttered toast and serve
hot with slices of lemon and water-
cress.

Date Gems.—Take one cupful of
flour, five teaspoonfuls of baking pow-
der, one-half teaspoonful of salt, one
cupful of graham flour, one cupful of
chopped dates, one and one-half cupfuls
of milk and two tablespoonfuls of
melted butter. Mix well and pour into
buttered muffin pans and bake thirty
minutes. This recipe makes one dozen.

Everyday Good Things.

A good soup or stew is always a
welcome dish on a cool, snappy day.

**Meat Stew With
Vegetables.**—Take
two and one-half
pounds of beef with
bone, two quarts
of water, two tea-
spoonfuls of salt, a
little cayenne, two
tablespoonfuls of
flour, one table-

spoonful of butter, two cupfuls of diced
potatoes, one-half cupful each of diced
carrot and turnip. Remove the meat
from the bone and cut into inch cubes.
Place the bone in the cold water. Season
the meat with salt, pepper and
roll in flour, then brown in the butter
with one small chopped onion. Add
this to the bone and simmer for an
hour and a half or until the meat is
tender. A half hour before the stew
is to be served add the vegetables, the
potatoes a little later than the carrot
and turnip which usually take longer
to cook. Be sure that there is liquid
enough, then drop in the dumplings
and cook ten minutes.

Potato Soup.—Take four good-sized
potatoes, three large onions, one and
one-half quarts of water, two tea-
spoonfuls of salt, one and one-half
cupfuls of evaporated milk diluted
with one and one-half cupfuls of wa-
ter, drained from the potatoes after
cooking, three sprigs of parsley and
a few dashes of cayenne. Boil the
potatoes and onions in the water with
the salt. When tender drain and
mash. Reserve the water for the soup.
Add the chopped parsley to the milk
which is scalding in a double boiler,
add all to the potato very gradually,
stirring to keep smooth. Season with
cayenne and celery salt and serve
very hot.

Drop Dumplings.—Take two cupfuls
of flour, four teaspoonfuls of baking
powder, one teaspoonful of salt, one-
third of a cupful of evaporated milk
and two-thirds of a cupful of water,
or one cupful of fresh milk. Mix the
dry ingredients, stir in the milk
quickly and drop by teaspoonfuls into
the hot stew. Cover and cook ten
minutes. Serve the meat in the center
of the hot platter, then a row or a
heap of carrots, then the potatoes and
a row of turnips. Around them ar-
range the dumplings.

Mushroom Gravy.—This is delicious
served with beefsteak. Take one cupful
of mushrooms, canned or fresh.
Fry in two tablespoonfuls of butter
until brown on all sides. Add salt and
pepper. Thicken the gravy from the
steak and add the mushrooms, let cook
up one minute then pour over the
steak and serve.

Lesson for March 17

THE CHRISTIAN'S SABBATH

LESSON TEXT—Exodus 20:8-11;
Matthew 12:1-8.

GOLDEN TEXT—For the Son of man
is Lord even of the Sabbath Day.

PRIMARY TOPIC—God's Day, Sun-
day.

JUNIOR TOPIC—God's Day, Sunday.

INTERMEDIATE AND SENIOR TOP-
IC—Keeping the Lord's Day.

YOUNG PEOPLE AND ADULT TOP-
IC—The Lord's Day in Modern Life

The designation "Christian's Sab-
bath" is a misnomer. The word "Sab-
bath" has a definite meaning. It sig-
nifies rest, cessation from action.
When God had finished the heavens
and earth, He desisted from creative
action (Gen. 2:1-3). Since God's cre-
ative work was completed in six days,
He ceased from action on the seventh
day, which was therefore called the
Sabbath, or Rest Day. Five definite
objects may be assigned to the Sab-
bath:

1. To commemorate the work of
creation (Gen. 2:3, cf. Ex. 20:11).

2. To keep alive the knowledge of
the true God. Creation witnesses of
a creator. Keeping the Sabbath in
mind kept in mind the creation, and
the creation made real the Creator.

3. A forward look to the time when
man shall enjoy full fellowship with
God (Heb. 4:1-10).

4. To Israel it was a sign of the
covenant between them and God
(Deut. 5:12-15).

5. It was made for man's well-being
(Mark 2:27).

At least while man's earthly con-
dition continues, the Sabbath is needed
to keep a proper balance between his
body and his soul.

1. The Fourth Commandment (Ex.
20:8-11).

(1) Obligations enjoined (20:9, 10).

(1) Work through six days (v. 9).

The command to work six days is
just as binding as the command to
rest the seventh day. In fact, there
can be no rest unless there first be
work.

(2) Rest on the seventh day (v. 10).

There must be cessation from all
work on the Sabbath. Since God gave
the example and then sanctified the
day, it should be kept holy. It was
not only to give relief to the physical
body but to be a time when man's
thought would be turned to God. It
was designed to keep fresh in his
mind the consciousness of God and
His mercies. The human spirit should
be refreshed by the study of God's
Word.

2. How this commandment may be
broken.

(1) By engaging in labor or pursu-
ing business interests on this sacred
day.

(2) By devoting it to amusements,
since it was designed to keep fresh
in mind the consciousness of God.

(3) By making it a day of feasting.

II. The Son of Man is Lord of the
Sabbath (Matt. 12:1-8).

1. The hungry disciples plucking
corn (v. 1).

This took place on the Sabbath day
and became the occasion for criticism.

2. The Pharisees finding fault (v. 2).

They asserted that Christ's disciples
were breaking the law, when in real-
ity they were only violating the tradi-
tions with which the law was encum-
bered. The Lord's purpose in institut-
ing the Sabbath was to conserve man's
highest interest and contribute to his
happiness. It is extremely unfortu-
nate when human tradition is ele-
vated above the Word of God.

3. Christ's reply to the cavils of the
Pharisees (v. 3-8).

In this reply He shrewdly answered
the Pharisees and pressed His tran-
scendent claim as to the dignity of
His person. This claim moved them
to plot His death. As to His claim,
observe:

(1) He is greater than their great-
est king (v. 3, 4). David, when re-
jected, was forced to do that which
was unlawful for him to do (1 Sam. 1).
Because they had rejected the one
greater than David, the plucking of
the ears of corn became a necessity.

(2) He is greater than their sacri-
fice and priesthood (v. 5). If the
priests, because of their position and
services, could violate the Sabbath
laws and be blameless, much more the
One greater than they in performing
His work of sacrifice and redemption
for them should be considered guilt-
less. He was the true sacrifice and
priest.

(3) He is greater than the temple
(v. 6). The temple, with all its gor-
geous rites and ceremonies, was typi-
cal of Christ. Much more then did
He have the right to do what He did.

(4) He is greater than the Sabbath
(v. 8), because He is Lord of the Sab-

Great Task of Happiness

It was for the joy that was set be-
fore Him that our Lord endured the
Cross, despising the shame. The joy
of the Ascension is but an echo of
the joy of Bethlehem, and the task of
Christ was one "great task of happi-
ness."

To Gladden Our Hearts

Love's siftings often precede His
liftings. He sifts to get rid of the
chaff, and He lifts to gladden our
hearts.—Selected.

Mrs. John Durrum Says
Could Write All Day
and Not Say Enough
Good About Milks
Emulsion

"Have been thinking for some time
of writing you in regard to Milks
Emulsion.

"When I wrote you last fall I was
very much discouraged. Doctors had
told me for five years that I had T. B.
Five doctors told me last fall that
I was in advanced stages of T. B.
"I have taken your wonderful medi-
cine all winter. Sometimes I would
neglect taking it every hour, but
would take several doses a day, and
this is the first winter for seven years
that I haven't spent most of the win-
ter in bed. I haven't been in bed sick
this winter, and for two years I had
been so sore across my abdomen I
couldn't bear to press on it. That is
all gone. I do all of my housework
now except washing; weight 117
pounds, and feel fine.

"I can't praise your Emulsion
enough. I tell every one I talk to
what it has done for me and feel
ashamed if I neglect it sometimes
when I know what it has done for
me and what it means for me.

"I could write all day and could
never write enough good words about
Milks Emulsion." Yours truly, Mrs.
John Durrum, 451 W. Green St.,
Frankfort, Ind.

Sold by all druggists under a guar-
antee to give satisfaction or money
refunded. The Milks Emulsion Co.,

Lydia E. Pinkham's Vegetable
Compound Helps Her So Much

Pittsburgh, Pa.—"I was just com-
pletely run-down. I had tired, heavy,
sluggish feelings and I could not eat.

I was losing in
weight. I read so
much about Lydia
E. Pinkham's Vege-
table Compound
and what a good
medicine it is, that
I started taking it.
I have taken eight
bottles of Lydia E.
Pinkham's Vege-
table Compound
and about the same in tablet form. This
is one medicine a woman should have
in the house all the time. I am improv-
ing every day and I sure am able to
eat. I am willing to answer any letters
I get asking about the Vegetable Com-
pound."—Mrs. ELLA RICHARDS, 21
Chautauqua St. N. S., Pittsburgh, Pa.

PROOF OF DYES
is in the dyeing!

Words won't dye a
dress, or coat, or sweater. It takes
real anilines to do that. That's why Diamond Dyes
contain from three to five times more anilines
than any other dye—by actual test.

It's the anilines in Diamond Dyes that do the
work; that give the colors such brilliance; such
depth and permanence. It's real aniline that keeps
them from giving things that re-dyed look; from
spotting or streaking.

Next time you have dyeing to do—try Diamond
Dyes. Then compare results. See how soft, bright,
new-looking the colors are. Observe how they keep
their brilliance through wear and washing. Your dealer
will refund your money if you don't agree Diamond Dyes are better dyes.

The white package of Diamond Dyes is the original "all-purpose" dye for
any and every kind of material. It will dye or tint silk, wool, cotton, linen,
rayon or any mixture of materials. The blue package is a special dye, for
silk or wool only. With it you can dye your valuable articles of silk or wool
with results equal to the finest professional work. When you buy—remember
this. The blue package dyes silk or wool only. The white package will dye
every kind of goods, including silk and wool. Your dealer has both packages

"Watch their Weight Increase"

Says One of America's
Greatest Children's
Physicians...

"When you serve children
This Wonderful Health Food"

"KARO syrup is the ideal food for the under-
weight child," writes an eminent children's
physician.

And he explains why:

Two tablespoonfuls of Karo in a glass of milk
improves its taste and doubles the food value
of the milk.

There are 120 calories per ounce in Karo—
which means Karo is a great energy food—
containing nearly double the energy value of eggs
and lean beef, weight for weight.

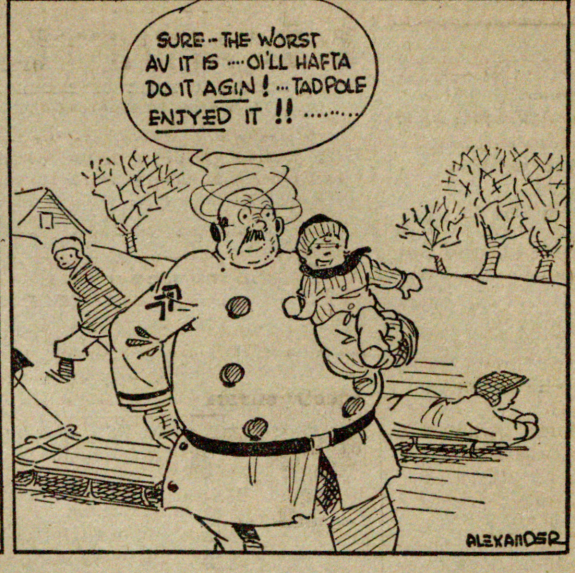

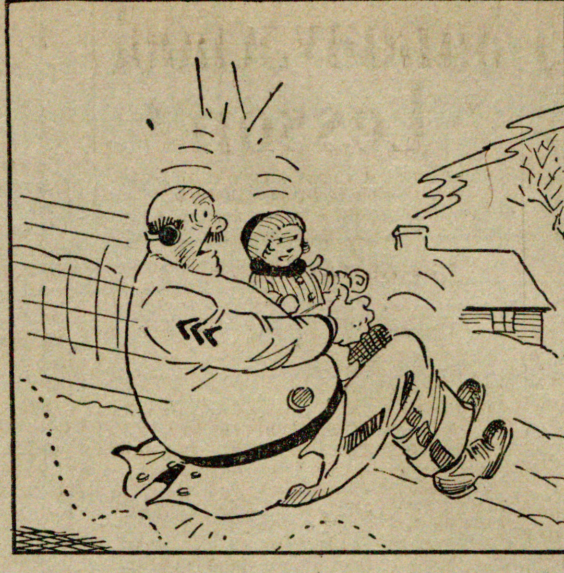

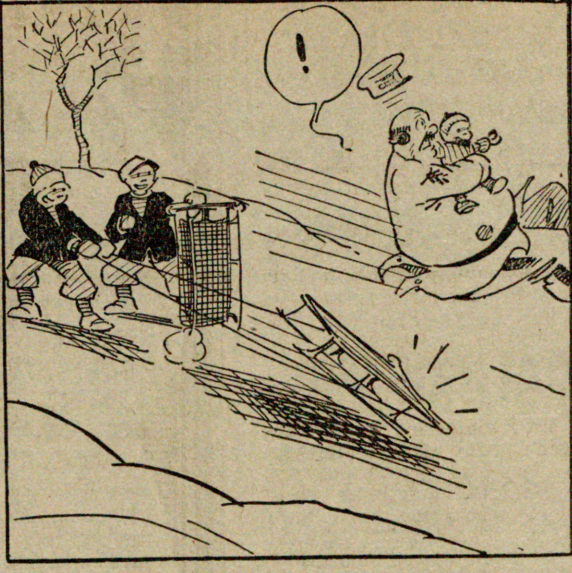

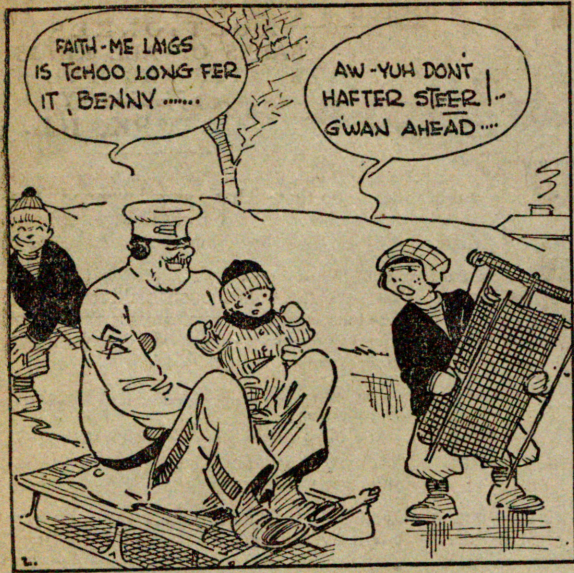

What is good for children is
splendid for the entire family.

Keep Karo on the table—serve
plenty of it—on pancakes, biscuits,
waffles.

NEW LENOX

The annual Town Caucus will be held this Saturday afternoon at the Urch hall. Fred Francis is a candidate for re-election to the office of supervisor and has no opposition. Edward Marshall of Marley is said to be a candidate for Justice of the Peace.

TELEPHONE LINK HELPS FARMERS HARVEST CROPS

Party Lines Form Basis of New Plan for Cooperation to Meet Labor Problem

Farm costs must be cut if profits are to be enlarged, declares a well-known South Dakota farmer, who adds that the difficulty of hired help makes it absolutely incumbent upon laboring farmers to combine their operations and to cooperate with one another whenever possible.

Pending the arrival of the era of large, industrialized farm, the smaller farmers, now minus hired help, must exchange labor to get tasks done. This has been accomplished in certain sections by what is termed threshing circles. Each farmer shows up on the appointed date with team and rack and collectively the men do the job, but the interesting fact—and it is a mute evidence of the value and importance of the telephone to the farmer—is that each circle is comprised of farmers who have service on the same party telephone. Time is so essential in the handling of large crews of co-operators that they naturally group themselves along the quickest line of communication. Thus, all the farmers on one party line are organized into one group and those on the next line into another group. The same principle is likewise applied to other co-operative operations besides threshing.

In the vicinity of Columbia, S. D., one place where the group method is employed with much success, the members work together in this way for at least fifty days of the year, sometimes more. The circles are built up around the telephone which is considered just as necessary and important a factor to modern, efficient farming as are any other labor-saving devices now being used.

At the beginning of the present year, approximately 2,600,000 telephones were located on American farms, an increase of about 100,000 since 1920, despite the fact that in the same period the number of farms in the United States has actually decreased by 100,000. On the basis of 6,371,640 farms reported by the Bureau of the Census in connection with the 1925 farm census, over forty out of every hundred farmers now enjoy telephone service and 14 per cent of the country's telephones are located on farms. The farm telephone is used to the greatest extent in the mid-west in the states of Idaho, Kansas, Nebraska, Illinois, Indiana, Missouri, Ohio, Minnesota, South Dakota and Wisconsin. Of states in the east, Vermont possesses the highest farm telephone development.

The telephone, indispensable in modern business, is being adopted by farmers to lower overhead, increase production, simplify operation and control markets. Quick communication has become as necessary to the farmer as it is in the industrial world.

A new telephone exchange in the city of London has been named Gladstone in honor of Great Britain's noted statesman. Another exchange has been named for Livingstone and still another for Macaulay.

British Columbia leads the provinces of Canada in the matter of telephone development, having 18.7 telephones per one hundred population.

Then He Understood

A little Neodesha (Kan.) boy, according to the Sun, was shown a drop of water through a powerful microscope, and was impressed at the tiny objects which he was told were microbes. "I know now," he said, "what bites you when you drink soda water."

The Best Installment Plan

One of the best applications of the installment plan is on a savings bank account.—Boston Herald.

TINLEY PARK

Town politics in Bremen township are getting hotter every day. Two tickets are in the field now.

Word comes from Mrs. Henry F. Bruggemann at Orange, California that she and her daughters are enjoying a wonderful time in the famous Golden State. Mrs. Bruggemann has recovered from the effects of a serious auto accident she figured in last fall and she is her former self again.

Mayor Wm. Funk has a new Chrysler automobile.

Richard J. Ryan has a new La Salle car.

A number of real estate men of Chicago were here the past week with a view of buying up acreage not developed or which has been started but not carried thru. It appears that Tinley is in for a boom.

Mrs. Philip Briethart celebrated her birthday last Thursday by entertaining a large company of relatives and friends. Bunco was the chief diversion. A fine luncheon was served. All had a good time.

Misses Viola, Jessie Wilke and Huerta Buddenhagen were guests at the home of the latter's sister Mrs. Fandrey in Chicago.

Mrs. Ray Brennan was hostess to a large company of relatives and friends in honor of her birthday anniversary Wednesday afternoon. Bunco was played and many beautiful prizes were awarded. There must have been a lot of cats as Mrs. Clemens was seen heading in the direction of the Brennan domicile with a big basket of food.

The Tinley R. N. A. held a public card and bunco party at the Community Hall Tuesday night. A very large crowd was present. Many very beautiful prizes were awarded.

Henry Goeb attended a bakers meeting in Chicago Wednesday afternoon.

Mr. and Mrs. C. A. Steinhagen entertained the following guests at dinner Sunday: Mr. and Mrs. Walter Steinhagen, Emil Szyuck, Mrs. Mary Ehler, Miss Lillian Kay, Mr. Keegan, Mr. Vandersee, all of Chicago; the Misses Jessie and Lillian Peters, Leslie Peters, Ray French, all of River Forest. Mrs. Mary Steinhagen, Milton Kay of Orland, Mrs. Fred Arnold and Mrs. Walter Medrow of Tinley Park.

Relatives, neighbors and friends gathered at the home of Henry F. Daul Tuesday evening in honor of his birthday.

Cards and bunco was played and every one had a good time.

At mid-night a delightful lunch was served. The guests all wished Mr. Daul many more happy birthdays.

Superfluous Detail

From a story: "Nell stirred his coffee with a steady brown hand and ran a casual eye down the columns of his newspaper." Precisely the color hand we should expect him to have after stirring his coffee with it.—Boston Transcript.

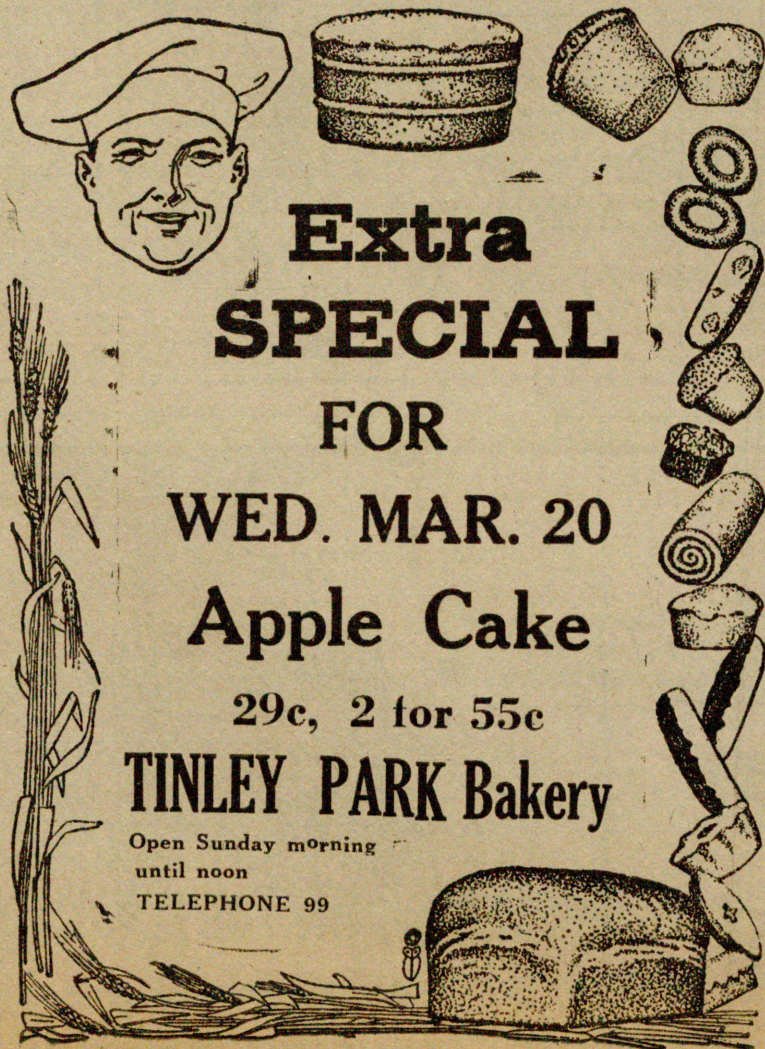

Precocious Artist

Works Hard, Dances, Gains 3 Lbs. a Week

"I work hard, dance and have gained 3 pounds a week since taking Vinol. My nervousness is almost all gone."—Mrs. F. Lang. Vinol is a delicious compound of cod liver peptone, iron, etc. Nervous, easily tired, anemic people are surprised how Vinol gives new pep, sound sleep, and a big appetite. The very first bottle often adds several pounds weight to thin children or adults. Tastes delicious. In Tinley Park by H. C. Vogt, Druggist.

That's the Question

"I say, doctor, did you ever doctor another doctor?" "Oh, yes." "Well, does a doctor doctor a doctor the way the doctor doctor wants to be doctor, or does the doctor doing the doctoring doctor the other doctor in his own way?"—Providence Journal.
